FOREWORD

TO preserve the memories of those carefree years, to be instrumental in recalling the friendships of those fleeting years of toil, we write these books.

To preserve the spirit of fellowship with our classmates and professors—to present to our individual circle of friends a glimpse of our "Life in College," this history of Alma Mater's sons and daughters is recorded—this, another constant is added,

"THE MODULUS"

ORDER of BOOKS

Book I. Administration
Book II. Seniors
Book III. Activities
Book IV. Athletics
Book V. Hit or Miss

THE power of a man increases steadily by continuance in one direction. He becomes acquainted with the restances and with his own tools; increases his own strength and learns the favorable moments and favorable accidents. He is his own apprentice, and more time gives a great addition of power, just as a falling body acquires momentum with every foot of the fall.

—Emerson.

History of Tri-State College

(President E. D. Long)

IN the summer of 1883 a number of the leading citizens of Angola, Indiana, formed an association for the purpose of establishing a Normal College. The first regular meeting of this association was held July 25, 1883. The following officers were elected: President, H. D. Wood, M. D.; Vice President, L. A. Hendry; Secretary, W. W. Ferrier; Treasurer, Lawrence Gates; Trustees, Orville Goodale, Orville Carver, L. A. Hendry, J. S. Draper and Professor L. R. Williams.

On June 17, 1884, the school was opened with thirty-six students, and before the end of the year the enrollment had reached nearly two hundred. The first faculty consisted of C. E. Kircher, Principal; W. S. Harshman, L. W. Creel, F. T. Burnham, Flora Work, Eddie Shepherd and Allie Cline. The next year, 1885, several changes were made in the faculty, and Professor L. M. Sniff became President of the school. During this year the Commercial Building was erected by the citizens of Angola, and the enrollment increased to about three hundred and fifty students.

In 1887, the management of the College was transferred by the College Association to the faculty consisting of Pres. L. M. Sniff, Professor L. W. Fairfield, Professor Charles Scaer and Professor W. J. Kinney. Professor Scaer sold his interest in the school and resigned his position as a teacher in 1894. Professor W. J. Kinney quit teaching in 1900, and sold his stock to Professor C. C. Sherrard in 1903. Professor Fairfield ceased to teach in the institution when he entered Congress in 1916, and in 1923 sold his interest in the school to the Company. This year, 1887, saw the erection of the Administration Building by the Company. In 1893, Professor I. A. Melendy, who had been a teacher in the school for a number of years, became a stockholder. The same year Professor W. O. Bailey became a stockholder and teacher. Professor Melendy sold his interest in the school and resigned his position in 1909. Professor Bailey is still a teacher in the institution. In 1900, the Law department was added, with Doak R. Best as Dean; and in 1901 the department of Pharmacy, with Professor C. C. Sherrard as Dean. In 1903 Professor Sherrard became an owner by purchasing stock from Professor W. J. Kinney.

In 1906, the institution was incorporated under the laws of the State of Indiana as Tri-State College of Angola, Indiana. At the same time two technical schools were incorporated, known respectively as Tri-State College of Engineering and Tri-State College of Pharmacy. The school of Pharmacy has not been in operation since 1918.

In 1908, Tri-State College (as a teacher training institution) was accredited by the State of Indiana, and the Engineering Building was erected by the citizens of Angola. With this building the College entered upon a new and enlarged program. The year following, 1909, Willis A. Fox, Lorin Stuckey, F. M. Starr and E. O. Maple associated themselves with the institution as stockholders and teachers. At the same time Professor G. G. Niehous, who for some time previous had been a teacher in the College, became a stockholder. Mr. Maple taught in the school for a short time, and disposed of his stock in 1914. Mr. Stuckey resigned his position as a teacher in 1911, and sold his stock to the Company in 1920. In the summer of 1909, Pres. L. M. Sniff resigned his position and Professor J. F. Bryant was chosen to succeed him. After one year, Professor Sniff returned and took up the duties of President, and continued in active service until the time of his death. In 1914, Professor Burton Handy, who had taught in the school for one year, became a stockholder. Professor Handy is still a teacher in the institution.

President Sniff died on September 14, 1922. On Jan. 10, 1923, E. D. Long, a graduate of, and a former teacher in, the College was chosen as President of the institution, and on April 16, 1923, assumed the duties of that office. In October, 1923, President Long became a stockholder by purchasing Mrs. Sniff's interest in the institution.

Aims

IN the forty-one years since its organization, Tri-State College has grown from the 60x60 frame building and 40 students to three commodius buildings and an annual enrollment of approximately1200 students. The school has no endowment and receives no aid from the State. It has nothing to commend it to public confidence but its work. Honest service alone accounts for the splendid growth the school has enjoyed.

Without hostility to either Church or State schools, and with full recognition of the fact that both are important, Tri-State College believes that an educational institution which will take a boy with one or two years of high school work, or it may be from the shop, and give him the opportunity to realize his best self, is worthy of respect. From the earliest years Tri-State College has offered to that great body of young men and women, who, from various causes, have been denied the privilege of a high school education, the opportunity to get an education even at a late day. Furthermore, her doors have always been open to that other group of young people who because they did not appreciate the value of education, dropped out of school, only to discover later that education is a necessity.

Outside of the School of Education, Tri-State College is not a standardized institution. This makes it possible for her to say to prospective students: You need not have a High school course to enter here. This brings to us many young people who have ability but not much schooling, and accounts for the fact that we always have a body of students such as would be a credit to any University. The fact that Tri-State College is not a standardized school also makes it possible for the directors of the school to put into practice the following motto: Put everything into a course that is necessary, leaving out all that is not necessary. Open this course to any one who can take it. Give all who enter an opportunity to do the work in the shortest possible time; and grant a diploma with the appropriate degree as soon as the course is completed.

The stockholders constitute the Board of Directors, which at the present time is as follows: Charles C. Sherrard, President; Willis A. Fox, Vice-President; Fred M. Starr, Secretary-Treasurer; William O. Bailey, George G. Niehous, Burton Handy and Ernest D. Long.

The members of the Board of Directors are all members of the faculty. At the present time the faculty numbers twenty-two.

FACES

Clashing of electrons in an incandescent star—
Ether-waves engendered, spreading wide and far;
Some stray to this earthy speck; and here get lost;
Back and forth they flicker, by reflection tossed;
Some by accident come through our eyes, and tell
Superficial tales of things that round us dwell.
We enslave these creatures, make them draw us maps,
Some of which as likenesses are true—perhaps.

THIS IS A BOOK OF FACES—
BUT, IF WE ANALYZE,
A BOOK OF MOTTLED SPACES
ILLUSIONING OUR EYES.
IS NOT A BOOK OF FACES
A VERY BOOK OF LIES?

That slender cheek engraved hereon
Was really never fair as that;
Ten years from now, all likeness gone
A jowl 'twill be, and thrice as fat.

That manly chin so smooth and clean—
Did you not know the finisher
Gave it its shave? Yes—and I ween
The camera was the launderer.

Of that white color. See that brow
Which youthful-looking is and clear—
You scarce would know the owner now,
The brush wiped out so many a year!

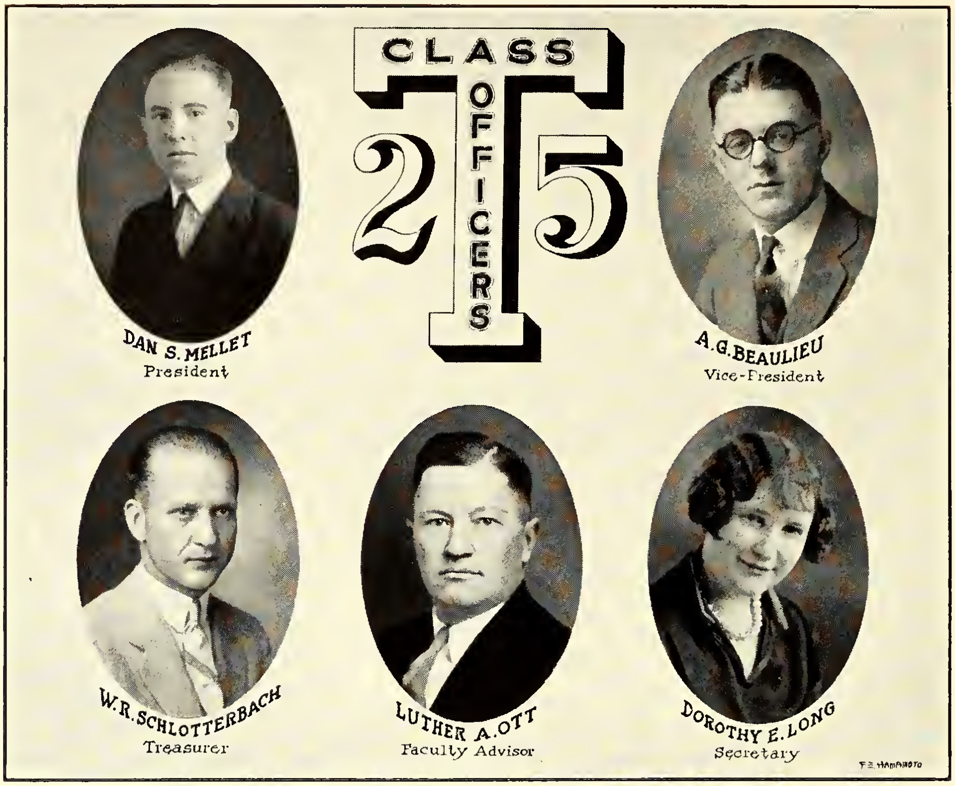
Those eyes upraised in lofty glance,
Those lips so jovially wide—
Hush! Better rest in ignorance—
There's probably a blank inside.

Maids of affected modest air,
Smile on serene; within this book
You're safe: no widely prying stare
Can deeper than the surface look.

Some of these faces are mystery masks,
Which baffle the mind that curiously asks;
While others are pitiful, abject confessions,
Betraying the owners' secret transgressions;
Some of these faces perhaps have made
Their owners—who make it a very fair trade.

THIS IS A BOOK OF FACES,
A BOOK THEREFORE OF LIES—
A BUNCH OF MOTTLED SPACES
ILLUSIONING THE EYES.
AND YET THESE SILLY TRACES
SHALL PROVE OUR STRONGEST TIES.

—Selected.



The Class of 1925

The Class of '25 was organized in the early part of the Spring Term 1925. At the first meeting a President, Vice-President, Secretary, Treasurer and Class Advisor were elected. In the meetings that followed the ways and means of raising the required funds for the Class activities were decided upon. Regular meetings were held in order that the many details of graduation week would be handled in an efficient manner.

The Class is grateful to Mr. Joseph Brokaw for his assistance in securing good pictures for the benefit movie nights and for the Opera House where the Class play, "The Seven Keys to Baldpate" was given. The citizens of Angola responded to the support of the Class activities and it is appreciated. The Committees were well chosen and carried out their work effectively. The details of the Class memorial, Class play, and social activities are given elsewhere.

The Class of 1926

The graduates of the Class of '26 were notified to meet in Chapel Hall on March 31, 1926. Prof. F. M. Starr was in charge of this meeting and under his direction the Class President, Vice-President, Secretary, Treasurer and Class Advisor were elected. Regular meetings were held from this date in order to attend to the various details of graduation week.

The Class put on two benefit movie shows and both were a success. The Class of '26 appreciates the courtesy and help extended them by Mr. Joseph Brokaw for these nights and for the Opera House where the Class play, "The Whole Town's Talking" was given for two evenings to appreciative audiences. The Class appreciates the support of the student body, the citizens of Angola and others to their Activities. The Committees worked hard and efficiently and accomplished much.

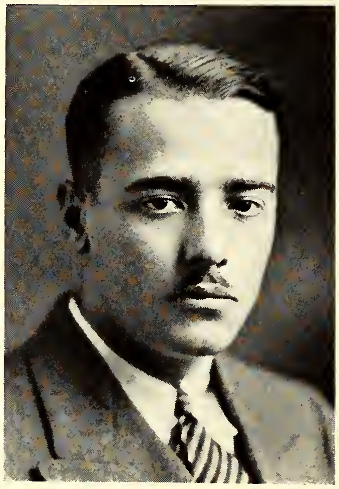
Class Song of 1926

In a land that everyone holds dear
There's a school that we all love to cheer,
Standing on a hill,
Oh, so proud to see,
'Midst the grass
And the trees,
Our dear T. S. C.
And the sound of that dearly-loved name
Holds a charm that always is the same
And we will sing thy praises,
Ever to the sky
Dear Tri-State as now we say good-bye.

CHORUS:
Our dear old Tri-State,
Sweet is thy name,
E'er will our voices ring,
With praises of thy fame;
And as we say farewell,
We're thrilled through, and through
With our glorious class of twenty-six,
And our dear old Tri-State school.

Words by HELEN R. GORDON '26
Music by FLOYD RODGERS '26

In Memoriam



Donald Eugene Leach
1903 - 1926

THE death of Donald Eugene Leach, son of F. C. Leach of Reno, Pennsylvania, occurred April 14th in Angola, Indiana, after an illness of a week's duration, pneumonia being the cause. He was born in Reno in 1903.

He graduated from the Oil City high school in 1920, going in the fall of that year to Erie where he entered the Electrical Engineering course at the General Electric Co. After finishing this course in two years he spent a year working for the firm. He entered Tri-State College in October, 1923, and would have received his degree of B. S. in E. E. on June 3rd, 1926.

He was a member of the Phi Delta Kappa fraternity.

The Engineering Society

By Fred J. Feulner '25

YOUR Society has but recently completed its twentieth year. From its inception in 1906, with a possible two score members, without a voice and without influence in a College world which was composed chiefly of two Literary Societies, the Philomathean and the Crescent, it has shown a steady growth, the gradual widening of its scope to include the social as well as technical activities of its members, and the expansion of its influence until it has become the only representative organization among the Engineering Student Body.

From a purely technical organization, one before which technical papers were read and discussed to the exclusion of all else, its programs have been enlarged to include musicales and motion pictures of general as well as technical interest, its influence has been extended to the general student body and the Alumni by promoting such activities as the Annual Engineers Banquet and Re-union, the Annual Picnic, Stunt Night parade and entertainment, various dances, the publication of the Integral, a monthly magazine devoted mainly to general social matters, and last, but not least, the Modulus, the only Year-Book of the College. That the latter is again in your hands after two consecutive financial failures, which have added their burden to a treasury already over-burdened, and which were due largely to inexperience in handling a work of this magnitude, but adds lustre to a record and is characteristic of the spirit of an organization which will not accept defeat in a matter for which, it feels, there is need for its services.

That your Society has performed a real service, there is no gainsaying. That it has, as a whole, been wisely administered by your officers who have been quick to seize every opportunity to enlarge its service to you, there is no denying. Mistakes have been made in the past, and no doubt, more will be made in the future. There seems no way of avoiding this, so our aim must be to avoid repetition. Each and every member has an inalienable right to his own opinion, and to the voicing of that opinion upon the floor of the Society. Since this is so, it is not surprising that even where interests and purposes are identical, there should be differences of opinion as to ways and means. Discussion is to be encouraged, but once the majority has ruled by vote, such differences must be submerged and whole hearted support given the matter in hand. This is necessary, if your Society is to function effectually. The dangers of clique or factional control and disputes cannot be over-estimated. If there are any among you, who, against your own better judgment or opinion, are inclined to support some measure or person for office, either through friendship or for personal gain, then you, indeed, are selling your birthright for a mess of pottage, and are operating to undermine your Society.

With all of this you are, no doubt, only too familiar. If the writer in the light of his own experience can but impress upon you to some small extent the advantages to be derived from active work in the Society, and can give some small encouragement to your officers, editors, and committeemen who are so unselfishly devoting their time and efforts to what at times appears to them but a thankless task and an added burden to a load already heavy, then this shall not have been written in vain. With this end in view perhaps he may be pardoned for intruding personal reminiscences and experiences into what was to have been a purely historical sketch. It is but natural for a new or prospective member to ask of himself or others, the question, just what, aside from the general benefits which are shared by everyone, can the Society do for me individually? It has become almost axiomatic that we derive benefit from any subject almost in direct proportion to the effort expended thereon. Personal experience has shown that this fact is not always understood or is often lost sight of. The writer was quite content when first joining your ranks to take but a passive part in your activities, and would, no doubt, have continued in this course had he not been somewhat unceremoniously shoved into one of your minor offices. Appreciation of the value of the work involved was to some extent apparent to him even then, and grew upon him until after holding several offices and serving on several of your committees, he was finally chosen as your President, but was not fully realized by him until after he had joined the ranks of your Alumni.

In that period of transition from a smaller to a larger world, which in the nature of things, must come to each of you, it was his lot to interview the Personal Directors of two Nationally known corporations, men through whose offices annually pass literally thousands of College men. Their words were almost identical and in substance were as follows: Your record in connection with your Engineering Society pre-disposes us in your favor. We have found from experience that Engineers as a whole are prone to confine themselves too closely to purely technical matters, and do not take enough interest in general business and administrative affairs. This attitude keeps many able men in positions beneath those for which their experience and training fit them. We therefore prefer men who while at College have shown some interest in Campus activities.

It is worth noting that this seems to a greater extent to be the view taken by the larger corporations. Upon second thought this appears logical enough. In an organization in which there are virtually thousands of men in executive positions, it is from the ranks of you men, that fresh supplies of human material must come. Society is so constituted today, that the individual is little, the organization everything. It is only by gathering together hundreds and thousands of men into one group with one aim and one purpose, that much can be accomplished. Is it not reasonable to suppose that men who, while at College have displayed marked ability to cooperate and work well with their associates, will continue to display

these qualities upon entering a larger world? If the writer remembers correctly, it was Charles M. Schwab who is once said to have remarked that if every stick and stone of the plants of the Bethlehem Steel Corporation were destroyed they could be replaced in the course of a few years, but if his organization were disrupted and disbanded he would be helpless. It is not the purpose of the writer or of the men he has quoted to belittle or slight the value of your technical training. It must be borne in mind that the acquiring of this is primarily what you are attending College for. It is merely to impress upon you the value of the training which lies ready at hand for you to acquire, and which no right-thinking man among you who has his own well-being and advancement at heart can afford to slight. In other words it is that extra subject you need, and an all important one.

Who in looking through these pages can say that your Society has not found full justification for its existence in this, but one, of its many services to you? That it may continue to grow and expand in the next two decades as it has in the past, is the sincere wish of one who has passed from among you.

THE ENGINEERING SOCIETY

This society constitutes the Tri-State College Student Branch of the Western Society of Engineers, the second largest engineering society in the United States. Many of the students avail themselves of the opportunity to enroll as student members of the Western Society of Engineers with the main offices in Chicago.

In the Winter Term 1925, the Engineering Society accepted the Constitution and By-Laws as revised by the Committee: F. J. Feulner, John Humphries, C. L. Hutchinson and W. F. Taylor. This has been beneficial in strengthening the organization. It provides that regular college credits will be given for regular attendance and active participation in the affairs of the society. This has been an incentive to the students who are members and to the new students to become members.

One very important part of our Friday evening programs is our moving pictures that are obtained from different industrial concerns. Sometimes slides are used that show us the latest and most efficient processes of manufacture of things of interest to the engineering profession. That these film showings do not lag in interest is due in a large part to the efficiency of the student operating the projection machine. Mr. Mark R. Hoover has been on the job regularly for nearly two years and served the society unselfishly and efficiently. He asked to be relieved one term previous to his graduation in June, 1926. He earned his vacation.

Chemical Society of Tri-State College

THE Chemical Society of Tri-State college was organized during the Fall term of 1925, as a sub-division of the Engineering Society. Its purpose is to furnish a meeting place for all those who are interested in work along the lines of Chemistry and Engineering. It also provides an opportunity for the development of some of the side lines, not strictly technical, yet so necessary to the successful professional man. Papers are presented on various subjects, short and interesting discussions are held and motion pictures procured from manufacturing concerns are shown at every meeting.

The members have shown a great deal of enthusiasm and willingness to do their part, since the first meeting, and needless to say with the continuance of this zeal and earnestness, and the good purpose the organization serves, the future of the society is assured for the time to come.

The Branch Societies

DURING the latter part of the Fall Term 1925 the Engineering Society organized the Civils, Chemicals, Mechanicals and Electricals into separate organizations, these branches meeting every two weeks and reporting their activities to the main Society. The Vice-President of the main Society helps the Chairman of each section secure the films, slides and speakers for their meetings. The student has a better opportunity of attending the particular section having the topics of most interest to him and this leaves the Friday evening meetings of the main Society for topics of a general nature and not too technical. This move met with the favor of the students and in this way the Engineering Society has increased its usefulness to the engineering students of Tri-State College.

These branch societies function for the three big terms of the year, the Summer Term the main Society caring for the needs of the students remaining for that session. Each branch organization elects a chairman and secretary for each term. On the opposite page will be found the officers of each section for the two terms of 1926 that the societies were in session.

The Electrical Section presented several motion pictures and slides of particular interest to students of Electrical Engineering. Mr. W. C. Kalb, general manager of the Corliss Carbon Co., Bradford, Pa., gave a very interesting and instructive address on February 19, his subject being, "Brushes and Brush Troubles."

On January 23, 1926, the Civil Section heard an interesting address by Mr. C. B. Huff, of Detroit, residential engineer of the Eastern Clay Products Association. He talked on the subject: "The Manufacture of Salt Glazed Vitrified Pipe" with many good slides showing the process.

The Mechanical Section has presented some good pictures and slides on mechanical stokers, steam turbines, diesel engines and other subjects of a mechanical nature. Mr. Ray Gallaher, formerly an instructor in this College, but now representing the Standard Oil Co. of Indiana, gave a very interesting lecture accompanied by slides on the refining of oils, the processes, etc., of this great industry.

The Chemical Section has a report on another page of their activities.

These lectures and pictures help to simplify the classroom studies and it is intended to enlarge the activities of these Branches the next year.

TRI-STATE RADIO CLUB
STATION 9BGT
OPERATORS
Y. E. HAMAMOTO

In Picture: Gilbertson, Simons, Reis, Delgado.
Power: 20 Watts 9 BGT 80 Meters

Radio Club of Tri-State College

THE Radio Club was organized during the latter part of the Winter term 1926, electing Paul H. Delgado as its first president for the Spring term, when the Constitution and By-Laws were written up and over 20 new members secured.

The purpose of the Radio Club at present is to promote radio communication between amateur stations in the U. S. and Canada, and to give those interested an opportunity to improve their knowledge of radio transmission and reception, and to establish a radio organization befitting Tri-State College.

The Club officers include the chief operator, whose duty it is to take charge of all apparatus and give instruction in sending and receiving the continental code. The Secretary and Treasurer handles the correspondence and financial affairs of the Club. The president presides at all meetings and is in charge of all activities of the Club.

The power consumption of the transmitter is 20 watts with facilities for increasing the input; the circuit is an inductively coupled Hartley type with break-in relay for instant change from send to receive position. The transmitting antenna is a two wire L type with a fan type counterpoise. The receiver, with detector and one step of amplification has a separate single wire aerial fifty feet in length.

Continuous watch between 6 p. m. and 12 midnight is kept and traffic from Canada and Florida has been handled. The Radio Club of Tri-State College, call letters 9 BGT, will be glad to handle any message from the Alumni, via phone or code, watch being kept on 80 meters.

The Officers are: Prof. W. A. Pfeifer, Technical Advisor and Consulting Engineer; P. H. Delgado, President; T. C. Hughes, Sec. and Treas.; E. Ekberg, Chief Operator.

Operators on duty: (All ex-commercial operators) are: E. Ekberg, P. H. Delgado, T. C. Hughes, A. J. Reis, A. T. Miller, and W. L. Faith.

The Blackstone Law Club

IT has been the endeavor of The Blackstone Law Club to make the work of the practice court, and the use of parliamentary Law of real practical value to its members. But its ideals are founded on good fellowship, co-operation and mutual understanding, by which the members are building characters that will be a great asset to them when they have entered into the practice of such a noble profession. In this organization the man is brought in contact with a life which is new to him. His ideas of legal business are enlarged. He sees undertakings involving the experience of renowned attorneys enacted by the Club. He finds people in relations—social, political, commercial—in which he has never before thought of them. As a result of his new environment prevalent in the club, he is continually accumulating valuable information and experience which will lead him to a better understanding of business and social relations, thereby broadening his horizon and enabling him to comprehend more readily the larger issues of human life and endeavor. The Blackstone Law Club embodies in its members the idea to discriminate the material facts from the immaterial, the ultimate from the evidentiary, and to deduce correct principles; not only to know the law, but the "reason of the law," and to think as a lawyer.

Sigma Mu Sigma

Founded 1921 at Tri-State College

ALPHA CHAPTER

ALPHA Chapter, National Select Mason Society, originated on Good Friday, March 25, 1921, at Tri-State College, Angola, Indiana; through the efforts of three earnest students: Claude R. Brown, Charles W. Knapp and Harold D. Van Vranken. Only Masons in good standing are eligible for membership.

Through the efforts of S. C. Brown, the influence of Honorable L. W. Fairfield, the co-operaton of Almond Fairfield and other prominent Masons, this fraternity became a national organization with chapters in some of the leading colleges throughout the country and with its head offices in Washington, D. C.

Alpha Chapter received its charter on June 6, 1924, at which time it was recognized as not only the first chapter, but also the Mother chapter of Sigma Mu Sigma.

The objects of this fraternity are to promote the cardinal principles of sincerity, morality and scholarship by thought, speech and actions; to uphold in every way possible those standards considered best to advance the life of the student physically, morally and mentally; to extend its services and council to all students by assisting them to form proper associations and maintain high scholarship; and to co-operate with the local Masonic institutions in promoting and cultivating greater educational and fraternal relations among Master Masons while at college in Angola, Indiana.

The first reunion of Alpha Chapter was held in Angola at the end of the Spring Term 1925, and was an occasion long to be remembered. Friendships were renewed and a general discussion to create further interest in establishing more branch chapters throughout the country.

Attractive club rooms are maintained, composed of a study and lounging room, and a dance or banquet hall, with the necessary conveniences to provide for worth-while social functions.

A paper published quarterly by each chapter contains the reports of Sigma Mu Sigma activities and announcements of the date, time, and place, of all meetings in the country.

"Fellowship is heaven
Fellowship is life
And the deeds that ye do upon earth,
It is for fellowships sake that ye do them."

Phi Lambda Tau

Founded 1924 at Tri-State College

ALPHA CHAPTER

THE Phi Lambda Tau fraternity was organized at Tri-State College, Angola, Indiana, March 30, 1924, and secured its state charter April 10, 1925. It is composed entirely of College students who are members of the Independent Order of Odd Fellows. The fraternity has attractive club rooms located on the second floor of the I. O. O. F. building in Angola.

Its well founded constitution is the keystone for its work, which has elevated it from a few charter members to a now thriving organization.

Many social functions are held each term which are a source of pleasure to all. A cordial welcome is extended to all college students who are members of the I. O. O. F. to visit the club rooms.

While just a young organization, it is one of the most active in college. It is the first of its kind to be organized, and it is expected that Phi Lambda Tau fraternities will be organized in other colleges, and in the future become a nationally known organization.

1925

1926

Phi Delta Kappa

Founded 1902 at Marion, Indiana

GAMMA CHI CHAPTER

Established 1922

THE second month of 1920 saw the birth of a fraternal organization known as the Delta Lambda Xi, composed of students and townsmen. Its purpose was to foster good fellowship. It was the first organization of its kind in the city of Angola. This band thrived and in due course of time decided to amalgamate with a nationally known order.

On March 13, 1922, the organization, having decided to accept admission to the greater Phi Delta Kappa order, was inducted and aided in the journey by Upsilon Chapter of Garrett, Indiana. The new chapter was to be known as Gamma Chi in the ranks of the Phi Delta Kappa Fraternity, the mother chapter of which was founded at Marion, Indiana, June 15, 1902. The charter members of the new chapter were: E. F. Bergen, Ronald Owens, Wm. O. Blakey, Olney P. Carroll, Harcourt Sheets, Bernard Walker, F. G. Berquist, Philip E. Hedges, H. E. Smith, C. M. Nash, Wm. H. Smith, Herloth S. Ryder, Ollie A. Bassett, Lyle M. McBride.

The fraternity has continued to grow, even though handicapped by the leave taking of students, who have completed the required duties at the college and who must take up their various positions and live at points some distance from the home base. The only cloud that dampened the spirits of the fellows was the passing of brother Lyle M. McBride, (Chick), on December 19, 1923. His passing has left a space in the ranks of the organization of the fraternity that can never be filled.

The social activities are many and varied. Smokers are usually held at the beginning of the school term in order that new men may meet fellows connected with the order, have a chummy get-to-gether evening, and enjoy the stunts arranged. The Christmas and anniversary dances, taking a formal aspect as tradition will have it, are usually affairs worthy of note and not to be missed by the boys wanting an exceptionally good time. Dances are also held throughout the year at the various lake pavilions and halls in town. These dances serve as relaxation from the trials and tribulations of studying the intricacies of mathematics and the various subjects demanding severe mental concentration. The rooms serve as a meeting place at all times where the policies of the day are discussed and diverse amusements are always at hand.

The chapter is now lead by local men who have the benefit of the order at heart and who conscientiously perform their duties as officers and foster fellowship among the ranks and file. The brothers who so ably represent the chapter are: Warren Purdy, President; Harcourt Sheets, Vice-President; George Stiefel, Secrtary; Harry Parker, Treasurer.

In addition to the officers immediately concerned with the more formal direction of Gamma Chi affairs, there are other posts upon which much responsibility rests for safe and proper conduct of pledges along their perilous route. Upon them also rest the burdens of smoothing the path for other officers of the chapter and its members. These men are: Don E. Leach, Shiek; Douglas Wood, Viser; Barton Arnold, Scribe; Jack Mayfied, M. C.; Fred Hardy and Sam Dixon, Guards; and Joe Garrard, Master-at-arms.

Beta Phi Sigma

Founded 1899 at Muncie, Indiana
TRI ALPHA CHAPTER
Established 1918

TRI Alpha Chapter of Beta Phi Sigma Fraternity takes great pleasure in announcing what it considers one of the most successful years of its life at Tri-State.

The Beta Phi Sigma Fraternity was organized September 19, 1899, at Muncie, Indiana, by William Van Horn Cassadey, Ralph Gorst, Joseph Hatton, Raymond B. Ball, Zorah Goodwin Clevenger, Doctor Clarence Gallher Rea and Roy Charles Palmer. From this small number it has grown to a membership of over 10,000 men.

The organization is a Greek Letter fraternal and secret society. It is not connected with schools, altho it admits to membership young men of school age as others do. Admittance to the order is gained upon invitation only. It is founded upon the Christian faith and teaches lessons derived from that source. It has chapters in every large city from Florida to Washington and from Pennsylvania to California.

The organization has been confused with the so-called high school fraternity and recently won high court decisions in the states of Missouri and California exempting their membership from any decision of local school authorities and restrictions imposed upon their membership by such an allegation.

During the war this organization had 87% of its members in the service, as recorded in its archives. Meetings of Betas were held in France in rest billets and other places and it claims to be the only American fraternity of its nature to have taken its ritual overseas.

Its membership is very loyal to the organization in every way. The organization has its own songs, the most popular one of this repertoire being "The Beta Rose."

Tri Alpha Chapter was organized in Angola June 4, 1918. The charter members are Albert Bremer, Harold Underwood, Charles Crain, William Fadus, Earle F. Lewis, William Nutto, George Hanson, John Quinn, Sheldon Flohr, Arthur A. Thomas, George Maynard and H. George Duquesne. The present active members are:

C. Lynn Akers
Wilbur R. Andrews
Robert H. Armstrong
E. Dale Barker
Norman Bird
Max Buck

"A Full House"

The Beta Phi Sigma fraternity has presented a play every year for the last three years and is beginning to consider the presentation of one each year as somewhat of an institution. This year it was "A Full House," a farce comedy in three acts, directed by Charles E. Shank. It was entirely a local talent production and was, we feel, a success both in the approval with which it met and financially. The parts, thanks to Mr. Shank's tireless efforts, the do-or-die spirit of those Betas who had them and the real ability of the Misses LuRayne Oberholtzer, Lois Golden, Marjorie Ryder, Berniece Gerard and the Mesdames Oberholtzer, Watkins and Austin, who were kind enough to assume the feminine roles, were very cleverly executed.

Lambda Phi Epsilon

Founded 1923 at Tri-State College

ALPHA CHAPTER

THE Lambda Phi Epsilon fraternity was founded in Angola, Indiana, in November, 1923. It is a local fraternity composed entirely of students of Tri-State College.

Lambda Phi Epsilon! The fraternity which has as its basic principle FRATERNALISM. It is the purpose of this fraternity to instill into life the spirit of brotherhood, that quality which is so vitally important in the success of every undertaking of mankind. Lambda spirit which the men of this organization enjoy means to them a love and a direct means whereby they may have understanding essential to tranquil fellowship.

The Lambda Phi Epsilon fraternity is not unmindful of the fact that the success which we have attained is due in part to co-operation of others and we wish to take this opportunity of expressing our gratitude to them.

We are also cognizant of the fact that had it not been for Tri-State College we would not have been benefited by an education such as is possible here and we would be obliged to go through life without the invaluable experiences we have had in our all too short a time spent at our school.

Alpha chapter is glad to say they are TRI-STATERS.

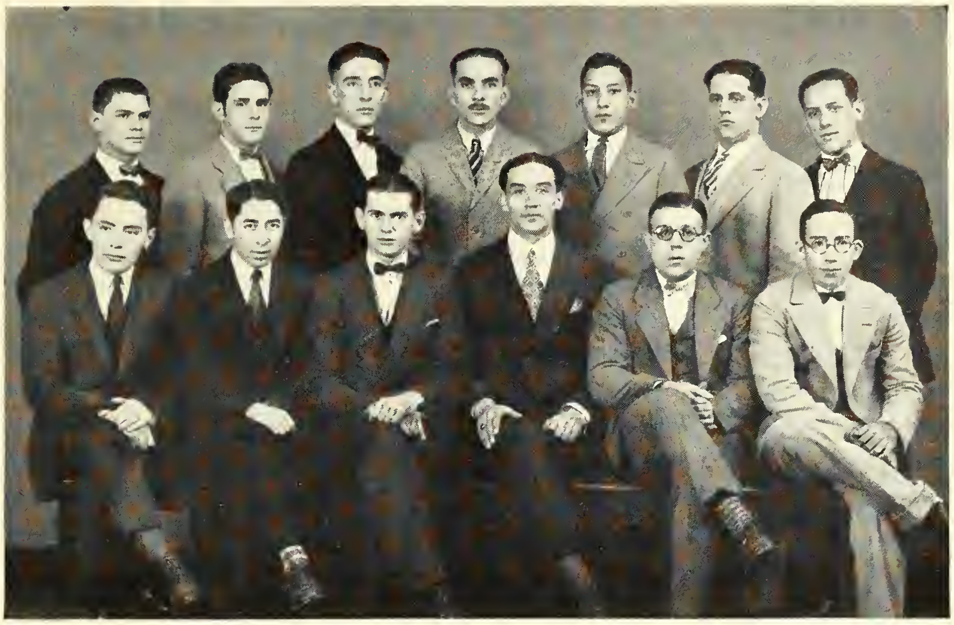
The Filipino Club

THE Filipino Club was organized in the latter part of 1920 by a group of splendid young men from the Orient. These young students represent a nation struggling for independence and recognition in the world of affairs. The club guided by lofty ideals has acquired a reputation as an active body of foreign students in Tri-State College.

It is gratifying to note, that the club has maintained its purposes for organization by continuing the friendly relations between its members and the Americans and by spreading accurate information regarding Philippine conditions and ideals.

The members of the club are grateful to the Faculty, their fellow students and the people of Angola for their guidance, encouragement and courtesy extended them during their college days here.



Top Row: Raul Gaya, Juan Casellas, Aurelio Montero, Eduardo del Valle, Paul Delgado, Jose R. de Armas and Angel Consuegra.

Club Hispano-Americano

THIS organization was established by the Latin-American students of Tri-State College, and from the first the purposes for which the Club was established have been successfully maintained by the administration of Mr. Dimas Millan (from Argentine, S. A.) who was one of the founders, and president of the Club during three terms. Their aim has been: first, to build up the friendship among the students speaking the Castilian language, and second, to work unanimously in behalf of their good reputation among the people of the United States. In a short lapse of time the realization of their ideals has become effective and in the future it will be of great value to them and an honor to their countries.

Many South and Central American countries, as Argentine, Colombia, Peru, Venezuela, Bolivia, Uruguay, Mexico, the islands of Porto Rico and Cuba and their mother-tongue country, Spain, are represented in this society.

Sunday afternoons when their souls have been afflicted with the usual home sickness, this has been a means of relieving these thoughts and of turning the week days of arduous studies into a social and brotherly reunion. The Club activities have been many and have helped to acquire knowledge and have established many lasting friendships.

The musical quintet known as the "Hispano-Americano Orchestra" has entertained the Club with their native melodies and has furnished programs to the Engineering Society and to religious and social clubs of Angola. This orchestra has broadcasted a program from station WOWO in Fort Wayne, Ind.

Let us hope that this enthusiasm of the Club continues so that these college days may be remembered as happy ones.

WESTERN
SOCIETY OF ENGINEERS
TRI-STATE
BRANCH

The 1925-26 "Modulus"

THE MODULUS as an annual, has been published by the Engineering Society since 1923, when the first volume appeared. "The Class of Twenty-Three presumed to think that Tri-State should not be behind contemporary colleges in sending out annually to its friends an exposition of its student life." The editors of the first edition published an interesting book, but realized that many issues were required to develop an annual to perfection. In this issue we find notice of the selection of E. D. Long as President of the College, after the death of former President L. M. Sniff in September, 1922.

The second volume, that of the Class of 1924, in general make-up is similar to the first one with an increase in the number of pages of some of the sections. In its pages we find a very interesting account of the founding of the Engineering Society by F. B. Martin in January, 1906, There is evidence of a more professional tone in its pages.

This year the editors have noticeably changed the physical appearance of the book and have still more noticeably changed the textual matter. A more systematic arrangement of the subject matter is the result of the study of yearbooks of other colleges with changes adapted to our own material. Owing to conditions prevalent in the Engineering Society it was deemed inadvisable to publish a MODULUS for the year 1925. The general belief that the events and roster of graduates for the year 1925 should not fall into oblivion resulted in this being a 1925-26 MODULUS. It was impossible to obtain all the pictures of graduates of either year and the names of those are printed as a matter of record. College life in its various forms has served as a motif for the decoration of the pages, particularly do the inserts and division pages remind us of some important high spots in our sojourn at this institution. This one idea has been in the artist's mind at all times—that the book should in later years, carry the college man and woman back to their old campus, back to the buildings they loved, and keep alive memories of those treasured years of their youth.

The Integral

By C. R. P. Cash '25.

AS one crosses the campus from the entrance gates rather a conspicuous window in the Commercial Building attracts the attention. Among other things the legend "Your Paper" is blazoned forth and directly underneath is "Next Issue" with a blank space in the frosting for posting the date of publication.

This is the window of the "Integral" office and we might say, en passant, that this same window is the result of one of Professor Fox's classes in applied psychology in which a past editor tried hard to assimilate the basic principles of advertising.

If one should take a peep into a book printed about a hundred years ago the first thing to attract the attention would be the rather droll practice of making the letter "s" like an "f". Fortunately, this old-fashioned letter has fallen into disuse except in mathematics, where in a new and fearsome form, it plays a commanding role as the integral sign. As in mathematics the integral sign signifies the summation, it is fitting that the paper that records the summation of our life at Tri-State should be named "The Integral".

We might mention that the Integral office, sandwiched between Professor Handy's lecture room and the book-store, is not a great deal wider than the window we described so that it resembles one of those mathematical slices, the width of which is smaller than any value that would be assigned to it however small. Within the narrow confines there is, nevertheless, great activity.

Here the staff prepares "copy", the editor anxiously scans contributions, (when he has them) or sends the corps of reporters into the highways and byways to gather news of various campus activities.

Then once a month, after wallowing in galley proofs and advertisement copy there is a final desperate struggle with the paste-pot and scissors and the job is done. This last preparation of the "dummy" for the printer is quite a harrowing process, the usual solution of the space problem being to surreptitiously cut out a few inches of the minutes of the Engineering Society where they will be missed least.

If those of us who have been privileged to work on the "Staff" take any pride in our past efforts it is that the "Integral" has helped us to spread that cement of mutual esteem and cooperation which unites a college into a single body having that highest of aims, the attainment of knowledge.

How many students as they read of their friends in the "Calendar", smile at the humor on the joke page, or peruse the "sports" for the details of the last game realize the force none the less powerful because intangible that is at work here? How many realize that after the first glimpse between those covers that they are bound a little more tightly by the pleasant bonds of loyalty and comradeship?

What a cold and futile thing a school paper would be were it a mere bromide of events! As such it would be valuable and doubtless give pleasure in years to come but students are young and today and all the future are for youth.

A chronicle, yes, but above all things an inspiration. There are times when the "Integral" may not have been the most accurate record, when its pages may not have shone with literary elegance or its jokes have been the quintessence of wit but we do not believe there has been a time when it has failed to awaken the "esprit de corps" of the students of Tri-State and fill them with a greater determination to master the task in hand.

"The Advocatus"

THE spirit and literary ability so prevalent and manifest in the law students was mandatory in the conception of "THE ADVOCATUS". The initial issue was dedicated to the highly esteemed Doak R. Best, B. S., LL. D., Dean of the Law School. "THE ADVOCATUS" is an outgrowth of a single page donated by the Engineers in their monthly publication, "The INTEGRAL". The law students, although feeling grateful for this opportunity, could not restrain the consuming desire to compose and edit their own magazine. This gave the legal lights an opportunity to enlarge on their ideas on any line they chose.

As experience is the chief factor in all things, it was hard for the law students to lay a foundation for the publication of the law school journal, but with true love and pride in their Alma Mater they determined to materialize this ambition. Since its debut it has achieved a remarkable success, receiving support from the entire student body. It has exceeded the expectations of its founders and has more than gratified the contributors for their efforts.

The purpose of "THE ADVOCATUS" was not to confine itself to the legal sphere only. It embodies articles not only of legal and literary lore, but there are pages of campus notes, fraternal and club news, and clever jokes of high order; making it an outstanding publication and one that the law students as a whole are justly proud of.

The staffs appointed to carry on this work have been composed of students who have withstood the severe test incurred by them in assuming the responsibility of publishing a finer and more attractive "ADVOCATUS" each issue. It is entirely fitting and proper that we should express our appreciation for the untiring and unselfish efforts of the individual members of each staff heretofore appointed.

The staff that is editing "THE ADVOCATUS" now, is composed of the following:

I. A. Quina, Editor-in-Chief.
Fred Egan, Associate Editor.
Murray Raskin, Business Manager.
Sam Swarts, Ass't. Bus. Mgr.
Val Steinmetz, Adv. Mgr.
Harold Markowitz, Publicity Mgr.
Donald Seibert, Chief. Rep.
Felix A. Kaul, Reporter.
Nelson J. Nussbaum, Reporter.
Terry Demorato, Reporter.

Stunt Night, October 31, 1924

SOON as the smoke of the Fall Term "conflicts" in Handy Hall had cleared away, the engineers began their talk about stunt night. The kinds of "Stunts" were decided upon by members of the departments in secret meetings.

The plans in detail were unknown to the student body. The Floats built by the fellows deserved the praises they received. The line of parade was from the Campus to the Public Square. The citizens turned out for the Halloween festivities.

The Chemicals had a replica of one unit of a great American industry, viz., "The Backwoods Still". With the flares, shrubbery, etc., and the odor of denatured (Good Natured) alcohol being distilled, beg pardon, we mean boiling, Mr. Volstead himself might have been fooled.

The Civils used a Masonry Arch as a symbol of their future work. This float showed skill and neatness of design.

The Electricals mounted a very large model of a radio set on their float. Mark Hoover furnished the static.

The Mechanical's float, a steam yacht, was the most elaborate one in the parade. Bill Schlotterback kept the black smoke pouring out the funnel.

After the students had parked their floats on the square, they stormed the Opera House to the stunts. The show opened with a splendid chorus, and the audience was appreciative of their singing at both appearances. The next act consisted of a variety of good vaudeville stunts. Heresay has it that, even Prof. Handy smiled once. The final act was the "Womanless Wedding" which had been well directed by Mrs. G. C. Unverzagt. "Slim" Diehl will be remembered as a cute little flower girl. Friends of the bride and groom remembered them with a vegetable shower, the guests being in the receiving line also. As the Integral Reporter has said, "A good time was had by all".

After the show, some of the students went to the dances at the Beta's and Odd Fellow's Halls.

Eighteenth Annual Banquet of the Engineering Society

THE eighteenth annual banquet of the Engineering Society was held at the Masonic Temple on February 21, 1925. About three hundred and sixty engineering students and their guests were present. Other guests were the faculty, Mr. H. E. Doerr of the Scullon Steel Company of St. Louis, Mr. W. S. Lacher, chairman of the Branch Committee of the Western Society of Engineers, Mr. R. H. Chadwick of the General Electric Company of Fort Wayne, and a number of alumni among whom were Messrs Walter Smith '13, Spencer, William J. Schnautz, Houser '24, Hull, Burke '23, Robinson, Lisle, Frank Adams '24, Stites '23, E. P. Raymond '24, Zimmer, Walker '23, and Walter Gruenberg '22.

Music for the evening was furnished by the Collegian's Orchestra and the High School Girls' Quartet accompanied on the piano by Miss Sarah Ramsay.

The address of welcome was delivered by Professor C. C. Sherrard followed by a short talk by Mrs. E. D. Long, in which she conveyed President Long's regrets for his inability to be present at the banquet.

Other speakers of the evening were Mr. W. M. Nichols, President of the Engineering Society, Mr. Lacher of the Western Society of Engineers, Mr. H. E. Doerr, general superintendent of the Scullon Steel Company and Mr. Chadwick of the General Electric Company of Fort Wayne.

A number of the alumni gave interesting reports of their experience since leaving Tri-State. Mr. William F. Taylor, chairman of the banquet concluded the speaking by a short address concerning the plans for the banquet next year.

The evening was brought to a close when Toastmaster "Bill" Pfeifer called on Cheer Leader Mel Bonellli to lead the house in fifteen "Rahs" for the speakers of the evening.

The response of the students to the sale of tickets and their reports as having spent an enjoyable evening more than repaid the banquet committee for their work.

After Dinner Mints

A colored couple in a southern town applied for a marriage license, to be used in about two weeks. About a week later the negro appeared at the city hall and asked the clerk if he could change the lady's name on the license. The clerk explained that a new license would be necessary, costing another three dollars. "Well," said Rastus, "Ah guess Ah'll have to marry the fust, thar' ain't that much diff'runce between them two gals."

—Mr. W. S. Lacher.

When Teddy Roosevelt was quite young he had a little difficulty with his English lessons. One day he had to memorize:

"At night the Turk lay dreaming in his guarded tent,
That Greece her knee in homage to him bent........"

When it came time to recite all he could get out was,

"At night the Turk lay dreaming in his tent,
That Greece her knee........." After the third attempt when Teddy stopped at the same place, the teacher said, "Well, why don't you grease her knee and maybe you'll get it over."

—Mr. R. H. Chadwick.

"When I first came to Tri-State there were about thirty students and three hundred girls here. Those were the good old days."

—An Alumnus.

"My little boy likes to use electrical terms for everything and the other day he came in and said: "Pa, I picked up a bug in the yard and one end was not insulated."

—An Alumnus.

Tri-State Radio Program

An excellent radio program of vocal and instrumental selections was arranged and given by the Buffalo Saxophone Company, Mr. William P. Schnautz, Manager, on the evening of May 18, 1925. This program was dedicated to Tri-State College and was broadcasted from Station WGR of the Federal Telephone Manufacturing Corporation.

Mr. William P. Schnautz is a member of the 1924 class of Engineers. The other members of his company are:

Messrs Roy Noah, John Herz, George F. Schnautz, Miss Alice B. Breary and Miss Elsie M. Schnautz.

"Seven Keys to Baldpate"

The play "Seven Keys to Baldpate" was the Tri-State College Senior Class play given at the Croxton Opera House on May 15-16, 1925. The play was given under the supervision of Prof. Charles E. Shank. The following people are to be given the credit for making the play a great success:

Mr. Quimby	Roy Hannon
Mrs. Quimby	Violet Sunday
Wm. H. Magee	William Repetto
John Bland	Arthur Beaulieu
Mary Norton	Dorothy Long
Mrs. Rhoades	Gertrude Fullam
Peters	Myron Johnson
Myra Thornhill	LuRayne Oberholtzer
Jim Cargan	Walter Newland
Lou Max	Albert Hoeh
Thomas Hayden	Alfred Vos
Kennedy	Parks Jamison
Hal Bentley	Virgil Foutz
Policemen	Alfred Salvidge, Tom O'Connor

Baccalaureate Services

The Baccalaureate service for the class of 1925 was held in the First Church of Christ, corner of West Maumee and N. Darling Streets, Sunday Morning, May 24. President E. D. Long had been chosen to deliver the sermon. In this inspiring address the class was told of the responsibilities as a citizen of the community, state, and nation they would encounter and how to meet them.

The class marched from the basement of the church to the middle section of the auditorium where seats had been reserved for them. The class and school colors were in evidence.

Faculty Reception and Banquet

Following a custom of previous years, the Faculty gave a reception and banquet for the graduates. This delightful social event was held in the spacious parlors of the First Church of Christ Monday evening, May 25. This reception was unusually successful. After the banquet everyone arranged their chairs in anticipation of several long speeches. But no—the Faculty had decided for a banquet sans after-dinner speeches. This met with the approval of the Seniors and all agreed the evening was a most enjoyable one.

Senior Class Dinner and Dance

The Senior Class, under the leadership of W. J. Repetto and Robert Haskel, met at Lake James Villa, Tuesday evening, May 26, for the Senior Dinner and Dance, the Dance being held at the Lake James Pavilion, and the music being furnished by the Black and White Orchestra.

After the dinner, the class president, D. S. Mellet and Prof. Burton Handy, and a few members of the class gave short talks bidding the class farewell after two years of enjoyable fellowship. The committee deserves much credit for the success of the evening. The decision as to when and where to hold this Dinner and Dance was made only after careful consideration by the class. The rumor is that this time it wasn't the Co-Eds who kept changing their minds.

Commencement

The Commencement exercises for the class of 1925 were held Friday morning 9:00 o'clock May 28, at the First Church of Christ. The address was delivered by Dr. Henry Noble Sherwood, State Superintendent of Public Instruction, Indianapolis. Many of the graduates expressed a desire to hear this inspirational address again. The Girl's Glee Club gave two selections and E. D. Slone a Violin solo. Following the program was the presentation of the diplomas by Prof. F. M. Starr and the benediction by Rev. A. P. Homer of the First Methodist Episcopal Church.

Stunt Night, October 31, 1925

THE Engineering Society sponsored the excellent program of entertainment given this evening on the third floor of the Administration building. The committee, D. G. Tilton chairman, succeeded in their efforts, with only a few days to work. The students as usual responded to the call for volunteers to decorate, get up stunts, etc. D. G. Tilton and Wm. Gore checked the vegetables at the door.

The Filipino String Quartet, consisting of Messrs Lazo, Rodriguez, Amen, and Acacia, rendered several pleasing selections. Mr. Canuto Udasco, gave us a treat, by singing a couple of songs in Spanish, accompanied by the String Quartet. Next, we heard some snappy popular music by Mr. Arthur Johnson on the banjo, accompanied by Mr. William Mingos at the piano.

The selections given by the vocal quartet, Messrs Pence, Crain, Harmon and Brandeberry, pleased the audience.

Eddie Slone's "strong" man act was a feature of the evening. Eddie challenged any man in the audience to lift him off the floor. Several engineers tried it. Oh, how McCall and Ray Bush groaned—but they couldn't lift him.

Last but not least was the Moot Court held by the Blackstone Law Club. This scene in one act was written by Mr. Bernard J. Dobrow and Mr. Kaltz, and was a scream from start to finish. Mr. Felix Kaul as Ivan Awfulitch, made application for his first citizenship papers. Kaul's acting would have done credit to a professional. That was the hardest looking jury that ever sat in a jury box. They paid such close attention (?) to the case. This concluded the indoor activities.

The line of parade was from the campus to the public square. The fire truck was loaned to us through the courtesy of Mayor Orville Stevens, a T. S. C. Alumnus. As on previous stunt nights the citizens turned out in large numbers. Some fireworks were lighted at the base of the monument, the biggest display being held at the ball park due to the generosity of the business men and faculty members. Large bonfires were lighted, and there were sinkers and cider in plenty. Thus endeth another Halloween night.

Banquet Committee

Top Row (left to right): R. T. Cunningham, W. C. Stammer and D. G. Tilton.
Bottom Row: C. H. Kuehn, D. R. Fitz-Simons, Dean R. M. Wetmore and Virgil C. Mehlenbacher, Chairman

NINETEENTH ANNUAL BANQUET OF THE ENGINEERING SOCIETY

THE nineteenth annual engineers banquet of the Engineering Society of Tri-State College was held Saturday evening, February 20, 1926, in the Masonic Temple. Four hundred persons, students, alumni, members of the faculty, and other invited guests attended this banquet, the most brilliant ever held by the society.

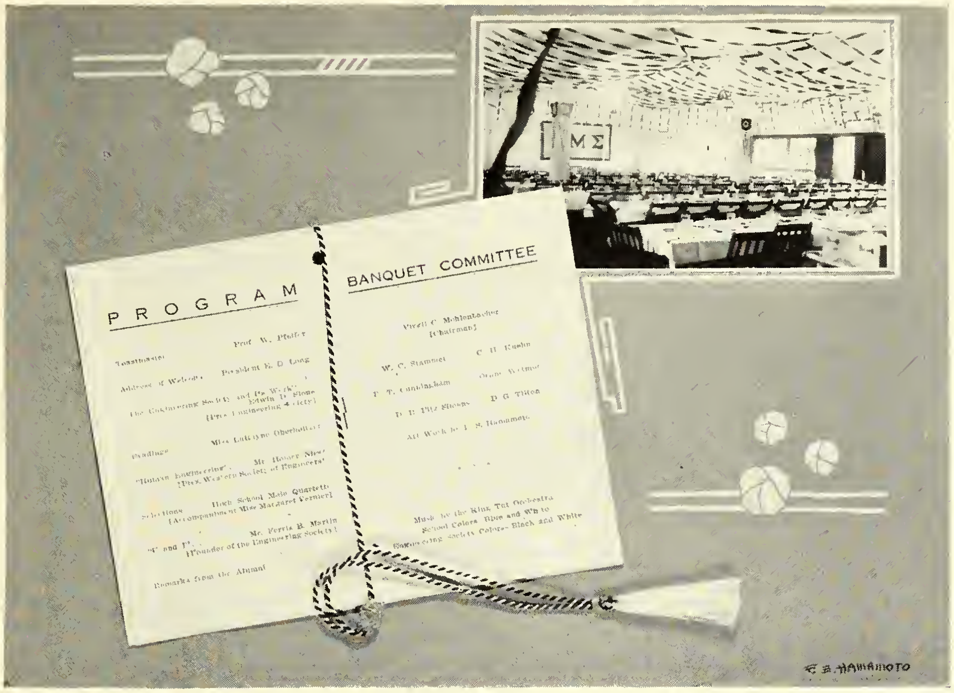
The first pleasing scene one beheld as he neared the temple, was the large illuminated, neat and unique emblem of the Western Society of Engineers, hanging over the entrance. Upon entering the temple all were ushered to the second floor, where the banquet was held. After the usual exchange of greetings between the students and alumni in the reception room, the banquet room was thrown open and everyone ushered in.

The banquet room was elaborately decorated in black and white streamers and pennants, the colors of the society. The several societies and fraternities of the students had their tables decorated beautifully with their colors as well as those of the engineering society. A beautiful floral piece of blue and white sweet peas, with the letters T. S. C. worked in it in blue and white the college colors adorned the wall back of the speakers table, while across the room hung a large, neatly made, illuminated seal of the society.

A delicious dinner was served by the ladies of the Eastern Star. Splendid music was furnished by the King Tut orchestra during the serving. The napkins and menus were of neat design containing the seal of the society. After dinner was served, cigars were passed and all the men enjoyed a good smoke.

The real treat of the evening was the after dinner program, with Prof. "Bill" Pfeifer as toastmaster. Prof. "Bill" has so splendidly filled this position for several years, that there is never a question as to who will be toastmaster on the occasion.

President Long was the first speaker introduced by the toastmaster. He gave the address of welcome to the alumni, and guests. In his address, he brought out the purpose of Tri-State College, and told of the noble principles which inspired its founder, former President Sniff: and of the sacrifices this man made that we may have this school.



The next speaker presented by toastmaster Prof. "Bill" after an intervening joke on the poor Irish, was Mr. E. D. Slone, president of the society for the winter term, who gave a very interesting address on the activities of the society during the past year. He pointed out the purpose of the engineering society, and told how it was beneficial to every engineering student.

Miss LuRayne Oberholtzer gave two splendid readings. She made a charming appearance, and showed rare skill as an elocutionist.

Mr. Homer C. Neisz, president of the Western Society of Engineers, and head of the Industrial Relations Department of the Commonwealth Edison Co. of Chicago, was next presented by toastmaster Prof. "Bill". He spoke on "Human Engineering", telling of the growing recognition by the management of large industries of the human factor in employment. Using the efforts his company is putting forth, as an example, he told how employees are allowed to purchase stock at special prices, of the special rates of life insurance they are offered; how they are encouraged to purchase homes through the building and loan association provided by the company, and how they are allowed to take part in the adjustment of labor difficulties. Mr. Neisz's address was very instructive and was highly appreciated.

The high school male quartet sang three numbers that were delightful.

Toastmaster Prof. "Bill" after another, "there were once two Irishmen" jokes, presented Mr. Ferris B. Martin of Minneapolis, the founder of the Engineering Society of Tri-State College. His address entitled, "You and I," will be long remembered by all present. Filled with wisdom, based on experience, and natural Scotch-Irish humor, he held the attention of everyone during his entire address. He also discussed the benefits of fraternities and of an organized alumni association.

Prof. "Bill" called upon several members of the alumni at this time. All had something to say of interest to the engineering students, and a good word for "Old Tri-State."

A few rousing cheers led by Mr. Balintyne and Mr. Dalton ended the banquet.

The floral piece was placed upon the grave of former President Sniff the following Sunday morning, by members of the society, as tribute of esteem to his memory.

The banquet committee deserves much credit for the great amount of work they performed in arranging for this occasion, and their efforts were appreciated by the society, to say the least.

Senior Show of 1926

"THE WHOLE TOWN'S TALKING"

A DELIGHTFUL COMEDY IN THREE ACTS BY
John Emerson and Anita Loos
Personal Direction of Charles Edwin Shank

SYNOPSIS OF SCENES

The action throughout the play takes place in the living room of the Simmon's home, in Sandusky, Ohio.

Time: The present. Early summer.
Act I.—Eleven o'clock in the morning.
Act II.—Morning. One week later.
Act III.—Nine o'clock the same night.

THE PLAYERS

Mrs. Harriet Simmons	Eleanor Keys
Anna, a Maid	Pearl Rigg
Taxi Driver	Floyd Rogers
Henry Simmons, a Manufacturer	Erlo Rogers
Ethel Simmons, his daughter	Estelle Howe
Chester Shields, a Young Chicago Blood	Lynn Akers
Chester Binney, Simmons' Partner	George Cash
Lila Wilson, Friend of Ethel	Gertrude Taylor
Sally Otis, Friend of Ethel	Valera Ransburg
Donald Swift, a Motion-Picture Director	Mac Seager
Letty Lythe, a Motion-Picture Star	Kathryn Ryan
Sadie Bloom	Arva Straw

COMMITTEES

Chairman Play Committee	William F. Taylor
Business Manager and Programs	Harry Haynes
Advertising and Tickets	Harry Haynes, W. K. Batchelet, W. F. Taylor
Scenery and Properties	Harold Keller, Chairman; Andrew Mickelson, Emery Knowlton, Gunner Martinson, Frank Laskosky, John Nordin and Russel Perry
Costumes	Estelle Howe
Lighting	Charles Keuhn
Decorations	Helen Hendry, Mildred Weaver, Helen Gordon, Leon Moros, Peter Cuica, Andrew Mickelson, Willis Batchelet and Martha Frink
Music	Eldon Reynolds
Prompter	Arva Straw

Music by Black and White Orchestra

SENIOR CLASS DANCE

The Seniors held a dance at Paltytown, Lake James, on Friday evening, May 28th. The Black and White orchestra furnished excellent music to the delight of the couples and the committee in charge, Lynn Akers and Norman C. Bird.

CLASS DAY EXERCISES

A Class Day Program was given on the campus Tuesday afternoon, June 1st at 2:15 o'clock. The Class of '26 erected entrance gate posts on the Southeast corner of the campus matching the memorial posts erected by the Class of '23 on the Northeast corner. In addition to this, a second memorial, a beautiful sun dial was placed near the Commercial building.

PROGRAM

Vocal Solo	Marie Snyder
Reading of Class Poem	Helen Gordon
Vocal Solo	Barbara Wellman
Class Song	Class of '26
Dedication Address	William F. Taylor
Response	Prof. C. C. Sherrard
Address	Pres. E. D. Long

COMMENCEMENT

The Forty-second Annual Commencement of Tri-State College was held Thursday morning, June 3, 1926, at 9:30 o'clock at the First Church of Christ. The inspiring address was given by Dr. William Grear Spencer, President of Hillsdale College, and was much appreciated by the graduates and their friends.

PROGRAM

Organ Prelude, "Organ Voluntary"	Harry Rowe Shelley
Processional, "Festal March"	J. B. Calkin
Selection, "Sing, Sing, Birds on the Wing" Duet—Helene Jane Hendry, Reginald R. Harmon	Godfrey Nutting
Invocation	Rev. W. E. Harmon
Selection, "Souvenir" Violin Solo by Mr. Konikowski	Frank Drdla
Address	Dr. Grear W. Spencer
Selection, "The Secret" Vocal Solo by Kathryn Ryan	John Prindle Scott
Presentation of Diplomas	Prof. F. M. Starr
Selection, "My Heart At Thy Sweet Voice" Contralto Solo by Barbara Wellman	
Benediction	Pres. E. D. Long
Recessional	

OUR MIDNIGHT FROLIC

IT was midnight on the campus, May 31st, 1926, and the rustle of something that sounded like tin was heard, then a few faint voices. Investigation showed that the Seniors were mixing paint, red in color. Many of the fair Co-Eds were present—game sports this night.

They left the campus in small bunches going East, West, North and South. A few moments later and a student is seen doing some artistic work uptown. What, Ho! The sheriff appeared and shouted: "I want you". He got the man he wanted. In an hour our artist was at his work again. The sheriff and all his deputies could not throttle the genius of the Tri-State men.

After that part of the program the crowd enjoyed dancing and singing while the chimes struck three o'clock in the morning. Our madness ended with the clang of the liberty (?) bell in the tower of the Administration building while several tied a captive balloon to the flag pole with the 2T6 banner floating in the breeze.

Tuesday afternoon a mass meeting was held in Chapel Hall. Even the undergraduates were invited to this session. The frolic of the previous evening was such a howling success a second frolic was demanded by the Engineers and Normals. Everyone was to meet at midnight on the campus.

The parade started with an ancient hearse in the lead and the public square as our destination. A huge bonfire was started and the sheriff fired a few rounds of ammunition in the air—but this only put more enthusiasm into the crowd.

The members of the board of directors and faculty were serenaded in a real lively manner.

The biggest surprise of all was the painting of the town pump at Fremont. Some persons not appreciating the presence of college students and their artistic work retaliated by throwing paint on our new memorial posts. M. A. Birmingham and his gang got busy the next morning and put the posts in order.

The Class of '26 will be remembered as the liveliest class in many years. These two frolics will long be fond memories of the happy days we spent at Tri-State.

FACULTY RECEPTION AND BANQUET

The Seniors were the guests of the Faculty on the evening of May 31st. This reception was held in the Masonic Hall and was a most enjoyable occasion. The speakers of the evening were: The Honorable L. W. Fairfield, a school man of wide experience and former U. S. Congressman; Prof. J. L. Estrich, Supt. of Angola city schools, and President E. D. Long.

Senior Class Will

THERE is a Tri-State Corporation in Angola that has not had any strikes but has kept on turning out ships. The ships made here are of five distinct types: scholarship, fellowship, sportsmanship, leadership and citizenship. Long hours are required to construct these ships before they can be launched, and it is indeed a heavy sea that sinks one of these ships. They may be seen in many ports of the world and you are fortunate if you take passage on one of these ships because you are sure to anchor safely in the harbor of Success.

KNOW ALL MEN BY THESE PRESENTS: That we, The Senior Class of 1926 of the Tri-State Corporation, also known as Tri-State College) in the city of Angola, in the county of Steuben, and State of Indiana, under the supervision of our many advisors have been able to uphold our distinctive characters and being of sound mind and of memory, do make, declare, and publish, this our last will and testament, in manner and form following:

FIRST. We give and bequeath to our beloved Corporation a beautiful sun dial and ornamental entrance posts as improvements to the physical property which will serve as a reminder of the peppiest crowd on the Hill.

SECOND. To E. D. Long, President of the Corporation, we give and bequeath a law library that he may be safe in making new laws.

THIRD. To Prof. Niehous, Chief Engineer of said Corporation, we bequeath an automatic fool proof slide rule, a chair on rollers and a pointer with a continuous supply of chalk on the end.

FOURTH. To Prof. Sherrard, Chief Chemist of said corporation, we bequeath a fund for replacing stolen articles which will enable him to further his research work in olive oil.

FIFTH. To Prof. "Bill", Chief Electrician of said corporation, we bequeath our permission to tell us more fish stories.

SIXTH. To Prof. Roush, Master Mechanic of said corporation, we bequeath all our hot air for laboratory work.

SEVENTH. To Prof. Handy, we bequeath a free employment bureau that he may be able to give all graduates a fairer chance in the world.

EIGHTH. To Prof. Fox, we bequeath a girls' rest room so he can find peace during his lectures.

NINTH. To Prof. Baily, we bequeath all the sunshine and happiness in the world.

TENTH. To Prof. Lake, we bequeath watches, rattlers, etc., to enable him to enjoy peace and contentment during the long hours of the night.

ELEVENTH. To Prof. Harshman, we bequeath all the sharps and flats and the memory of our melodius singing.

TWELFTH. To Prof. Ott our Class Leader, we bequeath our permission to lead the next Russian Revolution.

THIRTEENTH. To Judge Best, we bequeath a degree in governmental politics in behalf of his golden rule.

FOURTEENTH. To the good citizens of Angola, we leave sufficient paint remover to enable them to erase those monograms which are so numerous and so clear.

FIFTEENTH. To all other supervisors and assistants, we bequeath amiable dispositions, pleasant laughs and gentle voices to aid them in adding to the prosperity of the corporation.

SIXTEENTH. We do appoint our life-long friends and enemies, The Faculty, as sole executors of this, our last will and testament.

In testimony whereof, We have to this, our last will and testament, set our hand and seal, and publish and decree this to be our last will and testament, to which we subscribe our name and affix our seal, this the third day of June in the year of our Lord, one thousand nine hundred and twenty-six.

THE SENIOR CLASS
(Eldon W. Reynolds)

Signed, sealed, declared and published by the said Senior Class as and for their last will and testament, in the presence of us, who at their request and in their presence, and in presence of each other, have subscribed our names as witnesses hereto.

S. Merritt Bradsher, residing at Roxboro in the
County of Person, North Carolina.

Dale G. Voelker, residing at Jackson in the
County of Jackson, Michigan.

ATHLETICS

Foreword

ATHLETICS at Tri-State differ in some respects from the majority of colleges. The Fall term begins too late for a football team to be organized and drilled into shape. The work is so arranged for a two year course that very little time can be found in which to practice consistently, so our Athletic section is a small one.

However, with the small amount of time available for these activities, the Athletic Association and the teams deserve the support and hearty congratulations of the school. For few colleges with student coaches could put out the consistent winning teams as Tri-State does against other colleges with paid coaches.

The Athletic Association is a voluntary association of students for the purpose of promoting athletics in general. Its officers are President, Vice-President, Secretary, Treasurer and Coach. The school makes it compulsory to have the President a member of the board of directors. The remaining offices are filled by students elected from the student body. The object of the Athletic Association is to exercise a wise supervision over the Athletics of the school, and great care is taken that athletics do not interfere with the scholastic standing of the students on the teams.

The 1924-25 Basket Ball Season

THE 1924-25 basketball season at Tri-State College was one of the best in many years. The only College teams able to defeat them were I. B. C. of Fort Wayne and Valparaiso University.

Picking a team this year was one of the most difficult jobs he ever performed, admitted Coach Bennett. Although there were a few outstanding men, the remainder was but a game of chance as there were several men capable of filling the empty positions.

Stiefel and Owens will long be remembered by the basketball fans as one of the fastest combinations of forwards to represent the Blue and White. The fast playing of these forwards combined with the superb guarding of Seager, Bauerle and Akers is reason enough for the splendid showing the team made this season.

Seager, Akers and Harder were the only men left to build a team around the next year.

One of the interesting factors of the season was the close score in the majority of the games. One game was won by 6 points, two games by 4 points, one by 5 points, and three games by 2 points. Such close games created much enthusiasm among the students and a packed Gym was noticed at each game.

RECORD *of the* 1924-25 SEASON

T. S. C.	26	I. B. C.	36
T. S. C.	32	Anthony Wayne	23
T. S. C.	26	I. B. C.	33

BASKETBALL TEAM 1925

Top Row: Bennett, Coach, Harder, Burton Handy, Faculty Director of Athletics, Olson and Akers.

Bottom Row: Foraker, Stiefel, Cline, Bauerle, Captain; Seager and Owens

The TEAM

Coach Burl Bennett, "Ike". Coach Bennett was popular with the members of the team, and having every man's confidence it was much easier for him to put a winning team in the field. "Ike" knew his business as a coach and we regret his not being with us for the 1925 season.

George Harder, "Slim". Handsome George was a shining light on the Poughkeepsie H. S. team before coming here. He is a long tall boy and fits in fine at the pivot position.

John Bauerle, "Jawn". Captain Bauerle was a very versatile player and could fill most any position equally well. We are sorry "Jawn" has played his last basketball for T. S. C.

Lynn Akers, "Akers". Although Akers did not get into every game he was ready at all times and practiced with the team regularly. He was good on the defensive and offensive.

O. P. Olson, "Swede". Olson was injured early in the season and was kept out of the regular line-up. He was too good a guard for any man to get by him.

Don K. Foraker, "Pewee". Foraker played the bench most of the time, but we are conservative when we say he was fast and played a good game at the forward position.

Ray Stiefel, "Ray". Ray was one of the "rabbits". He was one of the fastest men who has worn a Tri-State uniform. There were many games saved by his ability to get around over the floor and shoot goals. Stiefel was the team's high point man for the season.

Naurice Owens, "Norry". Norry was the other "rabbit" and was a leading factor in the team's many victories. The Stiefel and Owens combination was much dreaded by the opposing teams.

Merrill Cline, "Murt". Cline, like Owens and Stiefel, was a member of the Angola High School basketball team when it won the District Championship. Murt's easy going decisive way won for him the confidence of every man on the team. His playing at center was commendable.

McClellan Seager, "Mac". Seager played regular as back guard and was a consistent player. Many a nice play has been broken up by his superb guarding.

The 1925 Baseball Season

TRI-STATE College finished the 1925 season in baseball with seven victories and three defeats. Among the teams meeting defeat were Anthony Wayne Institute, Hillsdale College, and Concordia College. Defiance College defeated Tri-State twice and Hillsdale College, our old rival, was victorious in one game also. The Tri-State boys played a fast game of ball all season. Although the season was a short one, Coach Parker and his team came through with a very good record.

The team was composed of new men, the only last year men being Parker and Kern. The main pitching staff was made up of two men, Wallace and Brandeberry, and Hiatt and Smyntek did the receiving. The infield with McAuliff, Nazario, Nillesen and Spaulding made a quartet which was dangerous to any team. The outfield with Kern, Beagle and Andrews went through the season with very few errors. Andrews had to give up baseball the latter part of the season on account of extra school work. The team missed Andy as he could work as a relief pitcher.

After the regular season's schedule had been played the boys got together under the guidance of "Jack" London and journeyed to Hudson, Ind., and defeated the fast Hudson Greys by a 5 to 3 score. The game was close throughout but Brendeberry held the opposing team to three safe hits, the rest being scored on errors by the Collegians.

We appreciate the valuable aid and suggestions "Jock" Sommerlot gave us as he was always on hand to aid the team in any way he could.

The TEAM

Sheldon Baker, "Bake". Baker did not play in the regular line-up, but was a valuable substitute and pinch hitter. He played a good game in the field as well as at the plate.

Theodore Beagle, "Ted". Beagle was one of the most reliable and steady hitters in the club, his errorless fielding a feature in every game. A very valuable player.

Russel Norman, "Russ". Russ was another man who did not play regular but was a capable man to step into the outfield and relieve any man at any time. Norman's speed was his greatest asset on the field.

Henry Wallace, "Wally". Wallace was one of the pitching aces, his good judgment and control was hard to beat. He was always in condition and ready to work as a relief pitcher. Wallace was a receiver also, but Coach Parker thought it best to hold him for mound duty.

A. Corwin Hiatt, "Coy". Captain Hiatt played behind the bat and in the outfield. As a receiver he was dangerous to all base runners, and he could throw the ball to second base with speed and accuracy. Hiatt covers the outfield like the dew.

Theodore Nillesen, "Ted". Ted played shortstop in first class style. His fast fielding and perfect throwing arm won him much recognition. Nillesen is a good batter and has credit for one home run and several base hits for the season.

Joseph Nazario, "Joe". Our Cuban whirlwind held down the keystone sack in great style. Joe's superb fielding and heavy hitting was one of the teams best assets.

Emmet Parker, "Em". Parker coached the team. Most of the credit for the successful season is due to his good management. Emmet also played the infield in an emergency.

Lucas Kern, "Moon". Kern was the Babe Ruth of the club as it was not unusual to see him smack one out for four bases. The opposing teams thought it advisable to keep their fly balls out of left field, for Lucas was sure death on them.

Raphael Torres, "Torry". Torres played at shortstop or around the hot corner. He was always ready and reliable. He acted as substitute.

George Rhodius. We must not forget our business manager, the one who has to do the worrying and is responsible for much of the team's results. George was one of the best sport writers on the Integral staffs in the last few years. We certainly appreciate the part Rhodius has taken in making this a successful season.

Harold Brandeberry, "Brandy". Brandy did not join us until the season was half over and he turned out to be the bright light of the pitching staff. With his ability it is no wonder he won six out of seven games, one being a post season game.

Robert E. McAuliff, "Mac". Mac was a small man for the initial sack but his fielding and hitting ability soon won for him a regular position.

William Spaulding, "Bill". Bill was one of the flashiest men on the team, holding down the hot corner like a veteran. He played a good steady game.

Edward J. Smyntek, "Little Eddie". Eddie missed being in the picture but he is one of the high point players. Eddie stops the balls behind the bat and is a good batter also.

BASEBALL TEAM 1925

Top Row: Baker, Beagle, Norman, Wallace, Burton Handy, Faculty Director of Athletics; Hiatt, Captain; Nillesen and Nazario.

Bottom Row: Parker, Coach; Kern, Torres, Rhodius, Business Manager; Brandeberry, McAuliff and Spaulding.

The 1925-26 BASKET BALL SEASON

THE 1925-26 basketball season at Tri-State College was not as satisfactory in the number of games won as in former years. Even the biggest and best teams will lose at times and this has been our off year. Our team did play hard for victory and though they won only three games, the boys are good losers and play a clean game. They made their opponents work for every point made.

The season opened against Valparaiso University at Valparaiso with a 25 to 20 victory. Things were not so easy with us following this victory and old man Hard Luck handed us a few defeats, which were generally by a small margin. The other victories were won from St. Mary's College and Battle Creek, these being home games.

Coach Parsell did not take charge of the team until the last half of the season. It is believed the record could have been improved had he been available for the whole basketball season. Perhaps another contributing factor in the defeat list this year was the small courts the team played on when away from home.

We had Captain Seager, Harder, and Akers left from last year to work with the new men. Seager and Akers were guards and Harder played center.

Prospects for next year's quintet seem very promising as Grabiec, Konikowski, Burggrabe, Harder and Menz will be with us and help drill a winning team into action.

BASKETBALL TEAM 1926

Top Row: John Grabiec, Enos Parsell, Coach; Burton Handy, Faculty Director of Athletics; Donald Niles, Sec'y-Treas.; and Geo. Harder.

Bottom Row: William Burggrabe, Willard Clark, McClellan Seager, Captain; Eddy Menz, Lynn Akers and Edward Konikowski.

RECORD of the 1925-26 SEASON

T. S. C.	25	Valparaiso U.	20
T. S. C.	13	Anthony Wayne	26
T. S. C.	16	Defiance College	28
T. S. C.	33	Auburn	44
T. S. C.	21	Hillsdale College	24
T. S. C.	27	Battle Creek	14
T. S. C.	20	Huntington College	21
T. S. C.	25	St. Mary's College	21
T. S. C.	24	Anthony Wayne	44
T. S. C.	33	Hillsdale College	43
T. S. C.	23	Huntington College	24
T. S. C.	25	Detroit City College	47
T. S. C.	22	St. Mary's College	42

The TEAM

John Grabiec. John played forward and as center and was good on the offensive and a tower of strength on the defensive. In other words, an asset to his own team and a liability to his opponents.

Enos Parsell. Coach Parsell did not take charge of the team until the last half of the season. The team began to show improvement under his coaching and it is believed the victories would have been more numerous had he been in charge of the team the whole season.

Donald Niles. Don was very busy as secretary of the Athletic Association and deserves much credit for his work for the team. He booked the games and arranged for the trips out of town.

George Harder. George finished his second year with the team as high point man. He played a steady game at center, and was a good basket shooter.

William Burggrabe. Bill played forward but did not get into the regular line-up until the last few games, when he proved his claim to a position. His floor work and passing was a feature in every game he played.

Willard C. Clark. Although Clark did not play in every game, he was of the "Old Reliable" type and could produce results when called into the game.

McClellan Seager. "Mac" was Captain of the team this year and played guard. Mac played a good game and was never headed off when it came to picking them off the bench.

Eddy Menz. Eddy was a very valuable guard and was responsible for breaking up more plays and getting more recoveries than any other player. We would say he wins the cast iron basketball.

Lynn Akers. Akers played as guard but did not get into many encounters due to an injured leg received early in the season. He was always ready to play when called in by the captain.

Eddy Konikowski. Eddy played as forward. The old slogan, "Little but mighty" held good in Eddy's case, as he played hard from the first sound of the referee's whistle until the last. We expect to see him in the line-up next year.

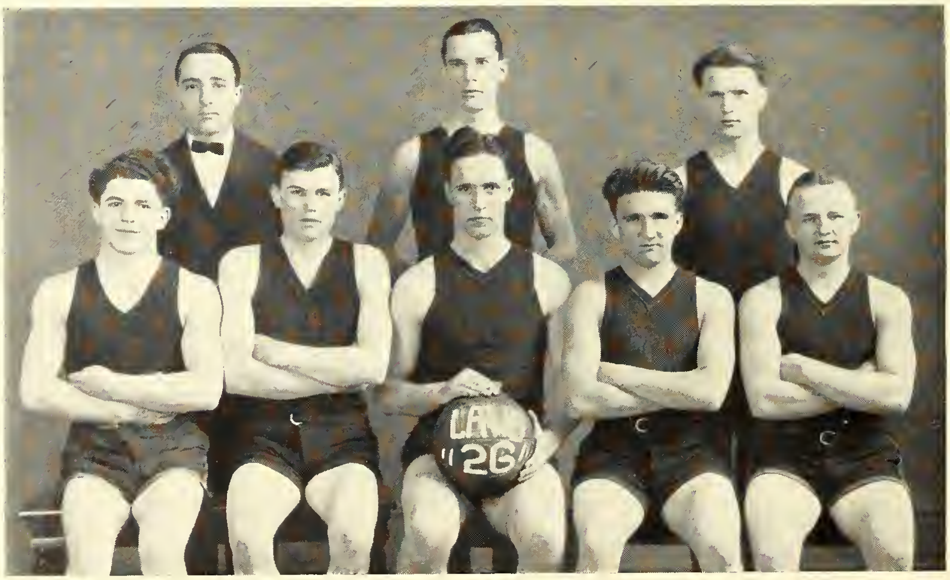
1926
Class-Champs

ELECTRICAL ENGINEERS---Interclass Champions

Clark, Grabiec, and Konikowski came through strong and made the Varsity team. The Champs by no means had easy sledding as the Civils, Mechanicals and Laws put forth some stiff competition.

Top Row (left to right): Gunnar Martinson, Donald Leach, William Clark, Eddie Konikowski and Emery Knowlton.

Bottom: John Grabiec, Prof. W. A. Pfeiffer and Paul Piper.



LAW SCHOOL BASKETBALL TEAM 1926

Top Row (left to right): P. L. DeVita, Coach; V. Steinmetz, V. Rosovitch.

Bottom: Wm. Caporale, R. Bradford, Fred Eagan, Captain; D. Seibert, Felix A. Kaul

Girl's Basketball 1925-26

THE Girls representing Tri-State College on the Basketball floor this year met some of the strongest competition of any previous Tri-State team in several years.

Even though they lost six out of nine games, one of which they dropped by one point and another by five points, the games were hotly contested and always interesting. The team was picked from new material and Coach Ralph Claudy is to be commended for his effort in training the new recruits. Claudy worked his team steadily and they tried to repay him in victories won but such is life and one side has to lose. We are hopeful of more success next year.

The outstanding features of this year's team was the fast floorwork and basket shooting of Platt, center, with Captain Chapman who played forward and was second high scorer on the team for the season.

RECORD *of the* 1925-26 SEASON

T. S. C.	19	Wayne Knitting Mills	16
T. S. C.	4	Auburn	24
T. S. C.	10	General Electric	17
T. S. C.	14	U. T. D.	3
T. S. C.	14	Wayne Knitting Mills	19
T. S. C.	4	Auburn	20
T. S. C.	21	Battle Creek	22
T. S. C.	8	Lincoln Life	3
T. S. C.	1	Battle Creek	14

Girls' Basketball Team 1926

Top Row: Betty Omstead, Ralph Claudy, Coach; Medise Goepp, and Georgia Koons.
Bottom Row: Thira Trexler, Lena Savieo, Luella Chapman, Captain; Pearl Rigg and Helen Miller

The TEAM

Betty Omstead. Betty was a splendid defensive player, a guard who was always in the way of the opposing forwards.

Medise Goepp. Even though Medise did not play in every game she was always ready and available for most any position.

Georgia Koons. Georgia played as center or guard and good in either position. She was very effective in offensive plays.

Thira Trexler. Thira played as forward and she displayed some good team work in the four games she was in.

Lena Savieo. Lena did some real work as guard and was equally ef- on the offensive or defensive.

Luella Chapman. Captain Chapman played as forward and was second high scorer with thirty points to her credit. Her basket shooting and dribbling was one of the seasons features.

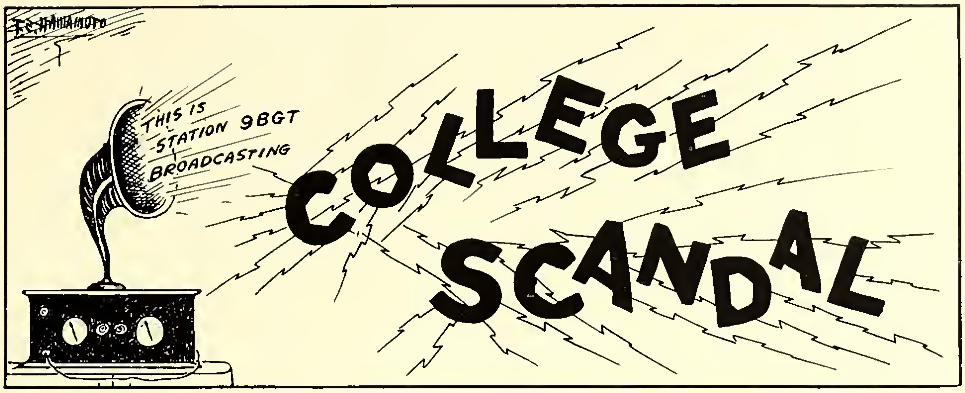
Pearl Rigg. Forward. Pearl was called into only three games, but always played a whale of a game from the bench.

Helen Miller. Helen was a very effective guard and played in every game. She was always in her opponents way and did not seem to mind a hard fall on the floor.

Violet Platt. Violet played center and in most games. She could throw the ball in the basket with ease and made a high score for the season.

HIT OR MISS

E.F. HAMAMOTO



THIS IS STATION 9BGT BROADCASTING
COLLEGE SCANDAL

Fall Term 1925---October

5. Even some of the dignified seniors of Tri-State found themselves in great danger of getting lost when they arrived in this budding, or should we say booming city.
6. All hands were up for conflicts in the auditorium at 9:00 o'clock this morning. There certainly were a lot of new faces in the fight.
7. Classes start today with a bang. A little stub of a cigar was seen taking "Kilowatt" Heim to class.
9. Engineering Society meeting tonight, and there was a fine crowd out. President Long gave a very good talk.
10. McCutchen arrives on the evening train and all the co-eds, inclined to corpulence, are besieging him for his method of reducing.
11. We ask Miss Clark to interview Mr. Humphries regarding some scandal and she coyly replies, "Why, yes, if I should happen to see him".
12. As the last of the stragglers are sauntering in, one of the engineers is seen frantically endeavoring to console a young co-ed, who has just discovered that Bill Kratzert has graduated and departed.
13. "Hutch" was seen on the steps of the Administration building waiting for someone.
14. The book store is still as popular as of old.
15. Fine weather today. The final ball game of the world series caused some excitement in the ranks of Tri-State's students.
19. Snow, snow, out come the mackinaws and galoshes. Students' eyes were affected by something extremely bright in the bookstore this morning. Examination disclosed the cause to be something on Iva Harrison's left hand. We wonder.
21. The first Masonic dance of the season at the Masonic temple tonight.
22. O. Detmer was wondering today why Prof. Ott wanted him to explain a theorem when as he said, "Any fool could see it."
26. Terrible calamity happened today. A large beam failed. Where? In Machine Design C class this morning when Mark Hoover moved a decimal point one place too far.
27. Observing engineers note the absence of powder from the faces of several of the fair co-eds.
30. Engineer Society met tonight and discussed the Stunt night.
31. Mark Hoover and "Tex" Keuhn are the chief fireworks shooters and certainly are working hard to get their act ready.

November

2. Jack Spurlock, the sheik of College Inn, is still in a class by himself. Harry Haynes is trying hard to compete with him, but still has far to go.
3. Ed Slone fainted in the physics laboratory this afternoon. Some thought he had seen a mouse, but he had not. The cause of his downfall was a "conclusion" on a student's Lower Physics "A" experiment.
4. John Wheeler is wondering what is the matter with everyone lately. Every time he reaches into his pockets, those around him move away, wondering what he has to sell now.
11. Horray!! No school on college hill, and even the weather wears a smile. Engineers marched in the Armistice Day parade, and attend exercises at Community Building. First night of the Psi Iota Zi Sorority and American Legion play, "Captain Applejack," a huge success. Several college students appear in this Arabian Night's adventure.
13. Friday, the thirteenth. Ed Slone is diligently endeavoring to discover how much air an air-dale can hold.
17. Now that the snow is fast disappearing, the boys seem to be awakening to the fact that snow is the substance from which snow-balls are made, and the small boys of the town, to say nothing of the co-eds, are being bombarded with snow-balls at the hands of these playful engineers.
20. "Bill" Repetto paid Angola a visit this week. Another good man gone "bugs" on Florida real estate.
21. A wonderful day. Masonic dance tonight. Have you noticed that "Shorty" Keller has been a regular attendant at dances recently? Never mind, "Shorty", we'd do that much for Stella, too.
23. Has anyone seen a "True Confessions" magazine? "Red" Hoyler could not find his to take to hydraulic class today.
29. The ice is getting thicker. Skating will soon be another real good excuse to skip class.

December

4. Sigma Mu Sigma fraternity pedges are dragged through the mill tonight and seem a little the worse for year. Public dance at Ollie's. Very popular. Our mighty Collegiates going strong.
5. Another Masonic dance and Johnnie Vogel with another girl. Too many girls won't do, Johnnie.

Dec. 22-Jan. 5. Christmas holidays. This is one thing we like about college life.

Winter Term 1926---January

5. Conflicts were in order today. All the boys came up to see Prof. Handy perform with his magic pointer which tells the tale for the term. The campus resembes a Florida real estate boom. "Try and keep from buying a ticket to something".
6. President Long gives a very interesting talk on "Booze".
8. Engineering Society resumes meetings for the winter term with a full house, "Kid" Slone presiding.
11. "Fitz" is not feeling so good after his debut in the art of ice skating.
13. A long line of Chemistry "B" students in front of chemical stock room looking for lockers. Very ambitious boys. Wonder how long it will last?
17. Fort Wayne is getting popular with the Betas. Dan Weaver went down this morning and we understand Dix has been a frequent visitor there.

THE LUCKY TRIO

19. Andrews did not wear his hat today—sign of Spring. Prof. Fox is giving intelligence tests today to the Normals. We'd like to see the Engineers take them, too.
20. Prof. Roush starts his class in the Industrial Organization. Our friend McCutcheon will get an extra hour of sleep now. Vogan seen walking up the campus with a fair young thing. What happened, Vog?
24. Galloway shows up Monday morning displaying a funny looking eye. He claims he got it playing basketball on Saturday. We know you're an honest man, Galloway, but don't try to kid the boys about it.
27. Mr. Zebrock, the shorthand expert, has been trying to tell us about "The Stock Yard Dance". Perhaps he means "The Chicago Hop". Anyway his demonstration was good and very difficult.
28. After sleeping through Gas Engine Class, Claudy mistook the college bell for his alarm clock, immediately sat up and demanded his breakfast.

February

2. Rumors of a new sorority for T. S. C. Normals. We haven't seen any pins yet, but in their place a red and green ribbon.
5. Best meeting in the history of Tri-State Engineering Society. Ed Slone acted as "cheer" leader and had all the boys singing popular songs.
8. The Hendry girls take the boys to the A. L. picture show benefit. They are the kind of girls to have, boys.
14. Mr. Zebrock gives an exhibition of his talented dancing at Lake George. However, he announces that he could have done better if the orchestra had played as he desired.
18. Claudy still sleeping in Gas engine class. Someone should invent a gas engine that would not liberate any exhaust gases, so Claudy could stay awake.
20. Lower Physics exams are in full swing this morning. Many of the boys are trying to save an extra term's work.—Good luck, boys.
22. From all reports, Eddie Harmon has had a new "queen" for every day of the past week. Some of these boys sure fall when cupid gets to work. In our last issue the girls were falling for Eddie, but all is changed, for Eddie seems to be falling for the girls.
25. From the number of black eyes around school, our pugilistic lawyer must be pretty good. Terry Demerto has an enlarged nose as a result of experimenting with import and inertia.
26. Our skilled Zebrock was seen at the Masonic dance giving an exhibition of a few new steps. He says it was the Reel Virginia—perhaps so, we won't argue.
28. Andrew Mickelson and LuRayne went to the dance at Lake Gage.

Spring Term 1926---March

23. The bell rings again at 9 o'clock. Conflicts! Prof Handy with his magic wand trying to integrate between the limits of time and satisfaction, but he seems to have a difficult time pleasing everyone.
25. Quite a number of new co-eds arrive in town and the boys are busy trying to get acquainted. Saw Williamson with a fair damsel. Who is she, Bill?
26. Mickelson is seen with a co-ed today. Is this a new one? The Engineering Society meets for the first time this term and the officers are a bit shaky in making their speeches.
28. Preitz ate a whole mince pie Thursday and hasn't recovered yet. Wonder if Ray Bolio has started to work on his dummy yet?

TRY TO DODGE HIM

DE OLE GANG OF MINE

30. Fitz and Couzens are seen dressed fit to sheik. Where to, boys? Cuica nearly drowned last night. The pillow slipped, the bed spread and he fell into the spring.
31. Molesworth wants to know, if a train is spoken of as "she", why can't some people step aside occasionally and let a lady pass?

April

1. Everyone is wearing his overcoat. Eddie Harmon gives E. Rogers his navy coat and Rogers gets seasick. Some people are very sensitive.
2. Did you notice the smile on Eddie Menz's face? Well, he received a "special" from his future to be.
3. Doc. Henning is in town. He is an instructor in Chemistry at Carnegie Tech. Chas. Hutchinson is in town for a "week-end". He didn't leave some books here, did he?
4. Easter, and the co-eds are seen sporting their new Easter finery. Couzens was waiting for an Easter bunny to bring him an Easter egg.
5. Mickelson and Nordin have been ill for the last few days. Claude West wants to know why the square root of 40 is 2. HELP! HELP! What seems to be the scandal about this double wedding? Two co-eds are involved and congratulations are in order. Did you notice how wide awake the fellows that are late to the 7 o'clock classes are?
6. Cramer wants some superheated steam for his can. Tilton wants some free steam. See Cramer, Tilton. Walter Moros returns for a short visit. He is an authority on "superheat" also.
7. The graduating class held its first meeting. Some case: A man comes 25 miles on a rainy night to see Eleanor Meyer. How will all this end, Eleanor? This weather should be wet enough for the anti-pros.
8. George Margetto, "The woman hater" wants to know the name of a certain "blond" co-ed. "Calc" Smith is looking for the bridge on his nose and Eaton is looking for a cap for his knee.
9. Estelle Howe and Margaret Fast are the first co-eds to get a ride in "Bezo's new gas buggy. Spring is here: Prof. Sherrard was seen chasing a golf ball on his lawn today.
10. The Normals are never idle. If you think they are, just look out the window any time and see them roller skating. No, they will never grow up, but why grow old in this age of beauty specialists. Fitz works on his "Lizzie". Eddie Harmon is seen with another new girl. Eddie, what is your "line"?
12. Marie Snyder is getting very skillful on her roller skates. It's impossible to realize how courteous and gallant some of the engineers are. For instance: Jay was seen to take a young lady in his arms and carry her across a mud puddle. They both seemed to enjoy it, even though he most dropped her.
13. There was some kind of meeting in chapel hall today, for co-eds only. They were not satisfied with a notice "Occupied" on the door, but had a strong guard at the door in the person of Mr. Flaishin. Ray Fortier is seen strutting around with "Just Married" on his back. Luella, where's the ring?
15. The course in "Campusology" begins. This is the most popular subject on the "hill". The co-eds collect the 'tuition' by 'intuition'. The student body and Faculty were saddened by the death of Mr. Donald Leach.
16. Prof. Niehous explains the method of finding the dav one was born on, but had nothing to say about how to find the day one is going to die. Life is so uncertain. So are girls.

PRESIDENT'S SUMMER RESORT AT LAKE JAMES

YE EDITOR'S DESK

HIS FIRST SNOW SIGHT

HOME-BOUND

18. The peaceful slumbers of our "overworked" students were disturbed this Sabbath morning by Angola's melodius fire siren. Why can't it blow when it is more convenient for us to go to a fire? Oh, Min!

F. S. Fisher admits he can write a love letter.

20. Summer weather today and we hear talk of the old swimmin' hole. A number of co-eds held a band concert this afternoon. The music was o. k. but it lacked volume.

21. One of our lawyers embarks on the salty sea of matrimony. Seyfer says the bending moments are still bending in Prof. Roush's room. It's a good thing the shocks are not shocking, for then the stresses would be stressing.

22. Two of our embryo lawyers buy a "Lizzie" and paint it in two different colors. If they get into an argument, each can take his own. Brokaw got hit on the head with a falling lamp shade.

23. The tryout for the Senior class play is held today and a number were there to test their ability to resist stage fright.

25. A good way to make dates, boys. Ask Morris about the man who returned the lady's glove. Geo. Cash goes fishing. This spring weather has a wonderful effect on George. Dorothy Howard and Ruth Saul are seen strolling down S. College street. Montgomery lives down that way.

28. William Kistler, the man from Milwaukee, has a few new ideas on making fire whistles so you can hear them without them making any noise.

29. Ruth Long is seen in town and we bet someone is happy. Bevan draws a locomotive in Machine Design "C" class. Someone heard the whistle blow and left the room. Maybe it was Kistler?

TRI-STATE INGENUITY

WHERE'S EDDIE ?

EXPERIMENTING

CLEANING THE STILL

PIPEOLOGY

RIDE 'EM BIG BOY

INTERESTING POINTS ON OBSERVATION TRIP

May

2. Many of the boys were at the station to see the new Co-eds arrive, but were disappointed when only one stepped off the train.
3. If you want a complete Integral: Seyfer—dy, and Kistler—dx; and there you are, the Calculus sharks.
4. Bill Gore should get some attention from the new Co-eds. If it isn't cloudy, one can see his new socks a mile away. Cash seems to be in love, when you hear him coming down the street whistling and singing—Postum.
5. Vogan says that a golf ball is what a man chases when he gets too old to chase anything else. Prof. Roush comes to class late, and some bright student wakes up and says, "Did you come in late, Mr. Roush? Put the first problem on the board."
6. Gallant took his spring bath in Fox Lake and it will take a week for the water to clear up again.
7. Dean Wetmore sure does know his onions. He says potatoes will grow larger if wrapped in tissue paper—to keep the dirt out of their eyes.
8. Bob Hatfield says: "It's no longer wine, woman and song; it's moonshine, a trained nurse and 'Lead Kindly Light'."
9. A good example of Connecticut energy (not kinetic energy) is Raymond Bush pushing a lawn mower. Mac Bryant is seen with Dorothy Long frequently.
10. Now we know why Harriet Wiley is wearing a frat pin. Bill Kratzert is back from Florida for a few days. We heard that Claudy is going to take a Normal course to use his spare time to good advantage.

'26 MEMORIAL

MAGNETIZED

11. Earl Gore and Eddie Menz seem to enjoy riding in a certain Ford coupe. Dick DeLyser and Paul Holm have the tennis fever and cannot do much home work of late. Tennis is such a love game anyway.
13. Leave it to Reynolds to get the new Co-eds. He was seen at the show with Edna Chrysler this evening. We wonder if he wins them with his violin.
14. Prof. Handy delivers another short lecture and says, "An honest confession is good for the soul". Some student remarks, "Yes, but it is hard on the grades".
20. The Mechanicals leave Angola on their annual inspection trip. The first stop is Elkhart where they see how slide trombones, base horns and 'agonyphones' are made. The afternoon is well spent at the works of the Dodge Mfg. Corporation.
21. A nice clean rainy day. The Studebaker Automobile works in South Bend is given the once over in the a. m. In the afternoon a trip through the South Bend Watch Co. was interesting. Why were some of the boys so slow in moving from one department to the other? The Electricals visited the General Electric Co. in Fort Wayne.
22. The Mechanicals visit the Mishawaka Woolen Mills in the a. m. and the modern and most up-to-date power station in this section of the country in the afternoon. This is known as the Twin Branch Power plant.
26. Too near the end of the term to study.
28. Friday and some of the fellows are leaving town. The call of home or somebody 'back home' is too strong. What if we did get a few per cent. off our grades?

June

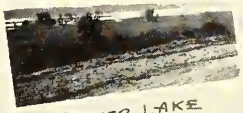
2. The "Midnight Frolic" of the Senior Class is 'the talk of the town.' Class Day exercises in the afternoon.
3. The Seniors appear for a big picture on the campus. The editor of The Modulus gets the "razzberries" from some of the loyal (?) graduates.
4 to 6. A few days rest between terms.
7. SUMMER TERM begins. Scores of girls report trying to get back to Normal. Registration day.
8. Mr. Voss calls at the Welch home for Miss Opal Clem, and they are seen headed east on Maumee street. The "conflicts" results in a 6:10 class for some of the engineers.
9. Dame Rumor reports necking parties are held in the parked cars at the noon hour. Tri-State Co-eds don't 'neck', do they Oswald? This must be only a rumor. The boys are busy trying to learn the names of new Co-eds. Now we know why the Engineers like to stay the Summer term. Did we hear Weir Crowl say: "Check!"
10. We hear Raymond Bush is thinking of studying Latin as an extra subject. Even that subject can be made interesting.
11. It seems Medise Goepp has lost interest in tennis since Junior Clark did not return this term.
12. Sam Krause and Anderson are out running levels today. Sam says he likes to see the Co-eds through the telescope. Distance lends enchantment.
13. "Barney" Bauerson attended a dance at Crooked Lake last night and surprised the boys.
14. Some of the boys are late to class as they did not get enough sleep over Sunday. Prof. Ott tells his classes a few of the rules to be observed in his room.

FUTURE TEX

DING-DONG! DING-DONG! ALL TO CLASSES

TEX

WATER RATS



SILVER LAKE

SNYDER'S "STRUGGLE BUGGY"

FOX LAKE

15. "Windy" Gordon entertains some of our Co-eds on the campus. Lesson No. 1 in "Campusology".
17. Tracy Cross wants to know why he gets so thirsty for Steuben county water. The ambitious lads are beginning work in the Chemistry "labs".
18. Vice-President Busbin provides excellent entertainment for the Engineering Society this evening.
19. EXTRA! EXTRA!!! Mr. Charles L. Hutchinson and Miss Helen A. Cline are quietly married in the city of Fort Wayne, Indiana. Mr. Hutchinson is a graduate of the Class of '26 in Electrical Engineering. Miss Cline of the Class of '24 in the Commercial Course. Station 9BGT radios the happy couple the congratulations of their many friends.
22. The final shipment of pictures goes to the engravers.
26. The proofs of the engravings are returned and our artist can rest from his labors.

July

1. At last!! The copy is delivered to the printer on schedule time.
5. School holiday. The town seems very quiet. Lots of fellows are away enjoying the celebrations in nearby towns.
13. The "Campusology" class under the shade of the old crabapple tree meets as usual. The latest gossip and bright remarks by our engineers is harmless as usual. Let us repeat the old war cry: The 28th or BUST. With this outburst Station 9BGT discontinues broadcasting the "Scandals of 1925-26". We hope you received our program clearly and we will now sign off. Good-bye, SENIORS and good luck!

TRI-STATE

By Georgia M. Taylor

Tri-State! we sing to thee!
Bring to thee
Our hopes so bright!

Tri-State! we sing to thee!
Hail the colors—
Blue and white!
Blue, the loyal student true
Who renders to the world her due!
White the fairest life sublime!
Tri-State! Thy sons would climb!

Tri-State! we sing to thee!
Cling to thee!
Fond memory!
Tri-State! we dream of thee!
Seem with thee
In revery!
Thou, the potter, and we, the clay,
To mold our path upon life's way!
Of thee we sing as years go by!
Tri-State!—Until we die!

(To be sung to the tune of the "Song of Love", from "Blossom Time").

† † †

The co-ed's prayer: "I ask nothing for myself, only give my mother a son-in-law".

† † †

Thrift, says Corrie, consists in telling the wife that she looks so much more patrician in simple things.

† † †

I stood upon a mountain
And looked down on the plain
I saw a mass of waving stuff
And thought it must be grain.
I looked again and thought it must
be grass,
When lo and behold, it was a Normal
class.

† † †

Clothes, I am going to class, if you want to come along, hang on, so says the co-ed.

What a joy Methuselah must have been to the life-insurance agents!

† † †

College would be a wonderful place if it weren't for the classes.

† † †

A new tailor in town used as a trademark the picture of a large red apple. Curiosity got the better of the village grocer and he asked the tailor why. "Well", said the tailor, "I'd like to know where the clothing business would be today if it hadn't been for an apple".

† † †

The girl of yesterday who could dress on so little lives now anew in the girl of today who can dress with so little.

† † †

Iva: "Can I get off tomorrow"?

Prof. Bill: "You've been off a good deal lately".

"I want to get my eyes examined".

"Get a good job done. You'll be looking for work after the first".

† † †

Prof. Moore: "What is natural gas"?

Vogan: "Natural gas is the result of the meeting of a hole-in-one golfer and a man with a perfect radio".

† † †

Sometimes when the cat's away her husband has the time of his life chicken chasing.

† † †

Feliu: "Why did they throw you out of the radio broadcasting room"?

Delgado: "For blowing my nose when the health specialist was making his talk on 'How to keep from catching cold in the winter time'!"

† † †

Love, Estelle Howe says, is like a sausage case because it contains many mysteries.

† † †

Couldn't a bunch of giraffes put on a hot necking party?

Cork: "Do you know you bore me"?

Corkscrew: "Well, you'll have to admit I've gotten you out of many a tight place".

† † †

"Check your baggage, mister"?

"No, she's coming with me".

† † †

They sat together on the sofa and admired the new engagement ring. She looked at the diamond set and whispered: "My, John, isn't it clear"?

"Only two more payments, dear", he replied.

† † †

With our instructions, any man who is light on his feet can learn the Charleston and become a real danger. —From ad in Dallas, Tex., Dispatch.

† † †

To label a girl's waistline "Waist" is now out of style. Label it: "Caesar Here!"

† † †

Prof. Sherrard says: "Even though a good many people wear glasses they can't see their own mistakes".

† † †

NOT A BIT NICE

"Does my daughter's practicing bother you very much"?

"No, but tell me, why doesn't she take her mittens off"?

THE HANDY HUSBAND

"Hear about Lake? He's a somnambulist, you know".

"Well"?

"He awoke this morning and discovered that he had been walking the floor all night with the baby in his arms".

† † †

AN OPEN SECRET

Mrs. Jones: "We are keeping William from returning to college this fall. He is really so young, you know".

Mrs. Brown: "Yes. My son flunked out, too".

† † †

"A wise man", says Williamson, "never makes faces at red-headed girls nor bites a mule on the ankle".

† † †

NO METAL CAN TOUCH YOU

We have no particular prejudice against college graduates and are willing to give even a junior a chance provided he buys a pair of garters on the way down to the office.—Fort Wayne News-Sentinel.

† † †

WHERE HE STOOD

"I asked my girl how much I rated with her".

"What did she do"?

"Whispered sweet nothings in my ear".

MODULUS SANDWICH MAN

ANGOLA LOVE

By George Cash

Our landlady is sure a dear,
She is so calm and meek
We cannot use the davenport—
Three dates allowed—per week.

Our company must leave at nine
In every kind of weather,
We have no cushion on the swing
Our hide is tough as leather.

Our beaux must smile and talk to her,
And tell her she's a brick.
She subjects us to the "Eagle Eye"
'Till Dammitall, I'm sick!

To all our doings in or out
She holds the lighted candle.
We must obey, the neighbors say,
Or we'll be marked for scandal.

We are not what you think we are—
We are never really bad,
We've had our share of discipline.
Don't believe it?—write my dad!

So next time that we see our beaux
We ask one thing, just this:
Turn out the light, deflect your eye
And let us have a kiss.

He's only an innocent engineer,
A diamond in the rough;
Believe us when we tell you this:
The poor boy is not tough.

So trust us all as we trust you,
Don't fear to go to bed;
For we are Tri-State girls, you see,
And Tri-State men we'll wed.

† † †

PSALM

Mr. Handy is our teacher
We shall not want
He maketh us to study our Geometry.
He leadeth us to the blackboard,
He restoreth our determination.
He maketh us to draw scandalous figures for our own sake.

Yea though we wade through theorems and data, we fear the prof,
For he tangleth us, and we can find no comfort,
He prepareth a very hard proposition for us us in the presence of our schoolmates;
He maketh us to blush with shame by showing our dullness.

Surely he will have mercy on us in the days to come,
If not, we will dwell in the buildings of T. S. C. forever.

A LOVER'S TRIALS

Why, sweetheart, call me dumb-bell,
When I've been so good to you?
When I've treated you so kindly,
Proved my friendship staunch and true.
After I did buy you gumdrops
When the ground was white with snow.
After I did help you eat them
Before to my home I'd go.

Didn't I take you to the movies
Just to while away the time,
Didn't I hold your hand so nicely
Spent a nickle or a dime?
Didn't I buy you peanuts dearie.
When the movie's lights were low?
Now, why do you cruelly call me
"Coo Coo", "Piker", let me know?

Didn't I steer you home from parties,
When you drank too much home brew?
Didn't I find the keyhole for you,
Kissed you like you asked me to?
Didn't I help your dear old Daddy
In the wagon when it came?
Didn't I go and buy you Camels,
Didn't I take all the blame?

Didn't I always give your kid sister
Nickels just to keep her out?
Didn't I bring your old man stogies
After he had taken the gout?
Didn't I feed your poodle wieners
When we went out to the fair?
Didn't I take it like a good boy
When my mouth was full of hair?

But those days are gone forever,
You will miss me if I go;
There'll be no one to buy you gumdrops
When the ground is full of snow.

† † †

Memories of Tri-State College

Tell me not, my dear old roommate
That you're glad the summer's past;
For you know our fun is over
And today will be the last.

Tears start when I think of parting
'Cause we've all been dear old friends.
This day brings all the sorrows
For to us it means the end.

Good times we are bound to have
Because we are all young and gay,
But we'll often stop and ponder
O'er the fun of a by-gone day.

We've had breakfasts, dinners, suppers,
Oh yes! and just a few dates;
When you stop to think it over
You'll wish you're back in old Tri-State.

Correct this sentence: "After I get a job", said a recent graduate, "I am going to study my Mechanics and Calc several nights a week".

MEN

Once upon a time I thought I understood men and could marry one of them with my eyes shut—but alas!

I have discovered that if you flatter a man it frightens him to death. And if you don't flatter him, he is bored to death.

If you permit him to make love to you he gets tired in the end. And if you don't he gets tired in the beginning.

If you believe all he tells you, he thinks you are a fool; and if you don't, he thinks you are a cynic.

If you argue with him in everything, you soon cease to charm him.

If you wear gay colors, rouge and startling hats, he hesitates to take you out. And if you wear a little brown toque and plain tailor mades, he takes you out and gazes all the evening at some other woman in gay colors, rouge and startling hats.

If you are jealous of him, he cannot endure you, and if you are not he cannot understand you.

If you join in his gaities and approve of his smoking, he vows you are leading him to the devil; and if you disapprove and urge him to give them up, he vows you are driving him to the devil.

If you are affectionate, he soon wearies of your kisses; and if you are cold, he soon seeks consolation in some other woman's kisses.

If you are a sweet, old-fashioned clinging vine, he doubts that you have a brain. If you are modern, advanced and independent, he doubts that you have a heart, or scruples.

If you are cute and babyish, he longs for a mental mate, and if you are brililant and intelligent, he longs for a helpmate.

And all the time, though he is falling in love with you for just what you are, he is spending the days trying to remodel, to make you over into what you are not, never were, and never can be, but "A man's a man for all that".

Isn't it the truth? —OLIVE OYL.

T. S. C. Students

We want to thank you for your business and friendship during the past year and extend a hearty renewal of your patronage this coming year. We have always been for the students and want to for all time to come. Allow the feeling between us to be mutual as it has been in the past.

THE CO-ED OF TODAY

Blessings on thee, little dame!
Bareback girl; knees the same,
With thy turned down silken hose
And thy short transparent clothes,
With thy bobbed hair—jaunty grace,
And the make-up on thy face;
With thy red lips reddened more
Smeared with lipstick from the store;
With thy Charleston and thy fun,
And thy grammar—thou hast none.
From my heart I give thee joy,
And thank my God for being a boy.

† † †

THE CO-ED'S ANSWER

Shame on thee, scornful gent;
Do you think that you were sent
Just to criticize a "Skirt"?
Shame upon thee, little squirt;
Upon mischief thou art bent,
On a girl thy spite is spent.
As far as grammar is concerned,
You are not a bit too learned.
Thy meter is a sore disgrace;
It has whiskers on its face.
Daddy's pest, not mother's joy;
We are thankful you're a boy.

† † †

Helen says the only path she is interested in is a bridal path.

TO THE CO-EDS

We have heard that most of you are very poor in algebra, but that you are good on "FIGURES".

TWICE TOLD TALES

Prof. Niehous—"Calculus is easy".

Prof. Sherrard—"Be sure and get your lockers today".

Prof. Roush—"Let's see if we are all here today".

Prof. Pfeifer—"We'll knock the back cover off the book".

Prof. Ott—"It looks alright".

Prof. Lake—"We'll go over this just once more".

Prof. Moore—"We will have a test tomorrow".

Prof. Baily—"Get into something hard, it's good for you".

Prof. Starr—"Close your books and we'll proceed".

Prof. Fox—"When I was a boy—"

Prof. Kessler—"Snap into it now".

Prof. Willennar—"It sounds like an exaggeration, but—"

Prof. Hartman—"Well, what do you think about it"?

Prof. Harshman—"Listen to this record".

Miss Burns—"You can order this of—"

Miss Clark—"Get ready for spelling".

Miss Waugh—"That's all".

A TOAST TO THE TEACHER

We've toasted that vampire sister
Who tempted weak Adam in sin,
We've granted she's paid for her folly
By watching the hearth fire for him.

We've seen how she's crept from his fireside
To ask for a desk and a chair,
And tormented the sons of old Adam
'Till they finally gave her a share.

Now to her whose motto is service
With a pay check that's pitifully small,
Whose task is the molding of nations,
Mind, body, and spirit and all.

Who follows the gleam as she sees it,
Whose vision the masses deride
Let us raise up our glasses together
And drink to the TEACHER—our guide.

—J. M. C.

† † †

TAMES 'EM ALL

"Is Smith a good chemistry student"?

"Good! I should say he is. He's got the acids eating right out of his hands".

THE ENGINEER

Who treads the path no man has trod?
Who wrestles with the chain and rod?
The Engineer!

Who racks his weary brainbound fate?
Those corkscrew curves to integrate?
The Engineer!

Who spills the H_2SO_4 upon his clothes
And on the floor; fumes in his eyes and up his nose?
The Engineer!

Who cuts off fingers in a lathe?
And daily in the oil doth bathe?
The Engineer!

Yet think not sadly on thy lot
Tho' hard it be, thy way is not
Among the lilies fair,
The senatorial chair, but grin
And listen to the Prof's tirade,
For by your kind the world is made.
The Engineer!

† † †

PART OF THE BARGAIN

She said very solemnly, "I cannot marry you because I do not love you. But I will be your sister".

"Good", he answered, with a triumphant smile; "and how much do you think our father will leave us when he dies"?

IN THE DAYS WHEN MEN WERE SWIMMERS

From "Sketches of Some of the Pioneers of McMinn County", in the Etowah (Tenn.) Enterprise:

"Thomas Cantrell in company with a Mr. Adcock, who was an uncle of his grand-mother, were captured at the battle of Cowpens, S. C., and placed on a British ship to be sent to England. After getting some four hundred miles from land they escaped by jumping overboard and swimming to shore, having to escape not only the dangers of the sea, but also the fire of the British".

† † †

Hastings: "I get a big kick every time I kiss Glora".

Gilbert: "Gee, she doesn't object to mine".

Prof. Bill believes that radio is still in its infancy. We can tell that by the noises it emits.

SOMEWHAT DISASTROUS

To have the landlady find you with your light burning in mid-afternoon.

To be broke without even a blank to write a one-way check.

To have a head that will not absorb Trig. by keeping the book under the pillow at night.

To meet the eye of a deacon while trying to save a dime out of your last quarter.

To be called on by Prof. Ott when you're unprepared.

To have someone with hobnailed shoes step on your meal ticket and punch out $4.90.

To be an hour late for 6:10 class.

To be caught in front of the Kandy Kitchen, with your best girl, and nary a cent in your jeans.

To open the letter from home which says. "Enclosed find", but fail to find the check for $........

To see "HER" out riding with some other fellow.

† † †

TOO TRUE

Getting the baby to sleep is hardest when she is about eighten years old.—Edworth Herald.

In a coupe or a porch swing?

Prof. Ott: This is the third time that you have looked on Smith's paper.

Mellick: Yes, sir, he doesn't write very plainly.

† † †

THE WEIGHT OF AUTHORITY

Schoolmistress: "Willie, give me three proofs that the world is round".

Willie: "The geography book says so, you say so, and father says so".

† † †

Al Munro: "Say, do you know what a Scotchman is"?

Vogan: "Yes, a man who keeps the Sabbath and everything else that he gets his hands on".

† † †

Mrs. Roush: "Why do you speak of your husband as a theory"?

Mrs. Niehous: "Because he so seldom works".

† † †

John Wheeler in Prof. Roush's class: "Say Prof. who is that guy, Pat Pending, anyway, whose name I see on different machinery"?

† † †

Prof. Sherrard: "And this is glass laso, porous glass".

Fitz-Simons (awakening): "Make it two".

The world loves a lover, boosts a booster, quits a quitter, and kicks a kicker.

THIS *fine printing costs you no more* because of its fineness for we know this; that should your printing become too costly, it also becomes a penalty, and cannot earn its way. An outstanding element which distinguishes Auburn Printing from all other kinds, *and for which you are not assessed*, is our ability to execute it with skill and economy.

Tri-State College

Angola, Indiana

Tri-State College offers courses in Civil, Electrical, Mechanical and Chemical Engineering which can be completed in ninety-six weeks. These courses lead to a degree in engineering. Graduation from high school is not required for entrance. The required preliminary work in Mathematics and Physics is offered by the College for those who have not had it. The aim of the College is to provide thorough and up-to-date instruction in Mathematics, Physics, Chemistry and the fundamental technical subjects, without the "academic work" usually required. The courses are planned for ambitious men who cannot spend a long time in school.

Tri-State College is accredited by the Indiana State Board of Education to offer courses for Primary, Intermediate, Grammar, Grade, and Rural School teacher, and for teachers of music in the public schools.

Tri State College offers courses in Law, Music, and Commercial work.

Write to the President for further information.

The "MODULUS"

Appreciates

The aid received from MRS. HELEN CLINE HUTCHINSON and MISS ALICE J. MURRAY of the College Office in the compilation of many statistics.

The pleasurable co-operation of MISS YETIVA L. CLARK and her class of typists in the preparation of manuscripts for the printer.

The help of MR. WILLIS A. FOX in securing the photos of Normal School graduates.

The assistance of MR. BURTON HANDY, who as an advisory member of the staff made valuable suggestions relative to the make-up of the book and worked unceasingly in the criticism of material submitted.

The moral and financial support of the Board of Directors, the Faculty, the Organizations, the Fraternities, and students to this project of the ENGINEERING SOCIETY.

The contributions of manuscripts by MR. F. J. FEULNER '25 and MR. C. R. P. CASH '25.

The co-operation of MISS HILDA CLINE and others of Cline's Picture Shop who have assisted.

The interested advice and suggestions of MR. R. B. WOOLEVER and MR. M. L. SMURR of the Fort Wayne Engraving Co. They have always been at our service and the editors are grateful for this.

MR. G. A. HACHET of the Auburn Printing Company. He has given many hours to plan and superintend the execution of this book, and has worked with such enthusiasm as though he were one of us, that the highest praise and thanks of the editors are his.

The co-operation of the business men and firms who have shown their loyalty to the school by purchasing advertising space in this issue.

All other co-operation and aid in the production of this, the third annual MODULUS.
